*The Andaman Islanders* Alfred Reginald Radcliffe-Brown, 1922      **The Making of Mathematics** Carlo

Cellucci, 2022-03-07 This book offers an alternative to current philosophy of mathematics heuristic philosophy of mathematics In accordance with the heuristic approach the philosophy of mathematics must concern itself with the making of mathematics and in particular with mathematical discovery In the past century mainstream philosophy of mathematics has claimed that the philosophy of mathematics cannot concern itself with the making of mathematics but only with finished mathematics namely mathematics as presented in published works On this basis mainstream philosophy of mathematics has maintained that mathematics is theorem proving by the axiomatic method This view has turned out to be untenable because of Gödel's incompleteness theorems which have shown that the view that mathematics is theorem proving by the axiomatic method does not account for a large number of basic features of mathematics By using the heuristic approach this book argues that mathematics is not theorem proving by the axiomatic method but is rather problem solving by the analytic method The author argues that this view can account for the main items of the mathematical process those being mathematical objects demonstrations definitions diagrams notations explanations applicability beauty and the role of mathematical knowledge      *Where the Grass Still Sings* Heather Swan, 2024-05-21 Through narrative verse and art *Where the Grass Still Sings* celebrates the many tiny creatures that play crucial roles in our ecosystems as well as the people on the front lines of the fight to save them Weaving art and science with inspiring stories of people doing their part to protect insects and the environment author Heather Swan takes readers around the globe to highlight practical solutions to safeguard our fragile planet Visit a sustainable coffee farm in Ecuador and a frog expert combating animal trafficking in Colombia Explore a butterfly sanctuary in an Andean cloud forest and learn about a family of orchid farmers who are replanting a mountainside to attract native pollinators Meet a bumblebee expert helping Wisconsin cranberry growers a bark beetle specialist in a new growth forest in Georgia an entomologist collecting for the Essig Museum in California and more Against a backdrop of climate change ecological injustice and impending mass extinction this book rekindles wonder and hope Featuring works by artists deeply invested in preserving the smallest beings among us *Where the Grass Still Sings* is a paean to the natural world
