focus on the European marine ecosystem or on themes other than the social interactions of humans and aquatic species. The chapters in this volume explore questions related to fishing practices and technologies, social status, human fish mollusc relations including potential over exploitation and fish molluscs in ritual practices e.g. as temple offerings, festival consumption, burial offerings and ideology and religion e.g. associated with supernatural beings or sacred space as hybrid creatures and as represented in luxury goods. The volume also examines aquatic species as a nonalimentary resource for example as jewellery inlays, dyeing and medicinal purposes. The material under investigation includes faunal remains, worked and unworked fishing gear and related tools, iconography and written sources. Many chapters also integrate multiple lines of evidence ranging from stylistic, contextual and iconographic analyses to zooarchaeological investigations. This volume is relevant to archaeologists, zooarchaeologists, biologists and anyone interested in human animal relations and/or the archaeology of the early Eastern Mediterranean and surrounding regions.
