

# The limits of corporate responsibility standards

Andreas Rasche

Warwick Business School, University of Warwick, UK

*I explore the limits of corporate responsibility standards – for example Social Accountability 8000 (SA 8000), the Global Reporting Initiative, the Fair Labor Association workplace code – by looking at these initiatives through Derrida's aporias of justice as set out in 'Force of Law: The "Mystical Foundation of Authority"'. Based on a discussion of SA 8000, I uncover the unavoidable aporias that are associated with the use of this standard. I contribute to the literature on corporate responsibility standards in general and SA 8000 in particular by showing (a) that attempts to standardise corporate responsibility can only be successful insofar as we recognise that compliance with SA 8000's rules requires a 'fresh judgement' every time they are applied, (b) that SA 8000 should not be pushed down the supply chain as such coercion does not require a truly responsible decision by suppliers and eventually leads to moral mediocrity and (c) that the necessarily time-consuming reflections about the singular contexts within which SA 8000 is applied challenge the urgent need for implementing this standard. I discuss the implications of my analysis of SA 8000 for corporate responsibility standards in general.*

## Introduction

Driven by the growth of governance gaps in the global economy, a global institutional infrastructure for corporate responsibility has been proliferating in recent years (Göbbels & Jonker 2003, Leipziger 2003, Paine *et al.* 2005). As argued by Waddock (2008), corporate responsibility standards (for example Social Accountability 8000 [SA 8000], the Global Reporting Initiative and the Fair Labor Association workplace code) are part of this new institutional infrastructure and are being increasingly adopted by corporations. Although these standards differ in detail, they all represent voluntary predefined norms and procedures for organisational behaviour with regard to social and/or environmental issues and usually claim to be valid on a global level (Smith 2002, McIntosh *et al.* 2003, Gilbert & Rasche 2007, Rasche 2009).

Despite their widespread use, we know very little about the limits of applying standards to enhance

corporate responsibility and thus miss insights about what we cannot expect from their application. Discussing the limits of these initiatives is crucial because managers often treat standards in a rather unproblematic way to swiftly respond to growing stakeholder pressure without considering the margins of standardisation. Regrettably, the academic community has not yet started to discuss the limits of standardisation to reveal the 'problematic' side of these initiatives. Corporate responsibility standards are usually offered as a set of quick answers rather than a way of grasping the numerous aporias that underlie the notion of corporate responsibility as such. Following Derrida (1993: 12), an aporia describes an undecidable situation in which we cannot turn to or justify one side of an opposition.

Considering this research deficit, the objective of this contribution is to explore the limits of corporate responsibility standards by relating these initiatives to Derrida's (1992a) discussion of the aporias of justice. Applying Derridian thinking is particularly

## **The Limits Of Corporate Responsibility:**

**The Limits of Corporate Responsibility** Neil Wolverson Chamberlain, 1973      **Corporate Responsibility and Political Philosophy** Kristian Høyer Toft, 2020-03-09 This book argues for the inclusion of the corporation as an integral element of political philosophy. It begins with a historical evaluation of the corporation as a constituent of political society. It shows how Adam Smith, Hegel and Marx conceived the role of the corporation in relation to the state, the market and civil society before moving on to the rejection of the corporation as a genuine moral and political agent by Rawls and Habermas. The next chapter of the book presents the corporation as a collective that possesses political and moral agency. The author outlines four distinct political philosophies of corporate responsibility: the Aristotelian conservative virtue ethical conception, the market liberal theory, the social liberal theory of corporate citizenship and political CSR and Marxist inspired critical theories. It is argued that the social liberal theory provides a better justification compared to its rivals. The third and final group of chapters applies the social liberal conception called the social liberal corporation to important contemporary issues including human rights in global supply chains, financial and digital firms sustainability and climate change. **Corporate Responsibility and Political Philosophy** will appeal to political philosophers, political theorists and applied ethicists as well as scholars in other disciplines working on issues related to business ethics, organizational ethics, sustainability and corporate social responsibility. As it provides a comprehensive introduction to corporate responsibility, it is also relevant to sustainability professionals who seek an overview of the theoretical debate on corporate responsibility.      **Corporate Responsibility** Archie B. Carroll, Kenneth J. Lipartito, James E. Post, Patricia H. Werhane, 2012-08-30 This thought provoking history of corporate responsibility in the USA is a landmark publication documenting the story of corporate power and business behavior from the mid eighteenth century to the modern day. It shows how the idea of corporate responsibility has evolved over time with the roles, responsibilities and performance of corporations coming increasingly under the spotlight as new norms of transparency and accountability emerge. Today it is expected that a corporation will be transparent in its operations, that it will reflect ethical values that are broadly shared by others in society and that companies will enable society to achieve environmental sustainability as well as a high standard of living. As we enter the second decade of the twenty first century, the social, political and economic landscape is once again shifting, the need for an informed public conversation about what is expected of the modern corporation has never been greater.      **Corporate Responsibility** Michael Blowfield, Mick Blowfield, Alan Murray, 2011-01-27 This textbook examines the multiple dimensions to corporate responsibility, creating a framework that presents a historical and interdisciplinary overview of the field, a summary of different management approaches and a review of the key actors and trends worldwide.      **Corporate Responsibility** Michael Blowfield, Mick Blowfield, Alan Murray, 2014 This textbook examines the multiple dimensions to corporate responsibility, creating a framework that presents a historical and interdisciplinary overview of the field, a summary of different management approaches and a review of the key actors and

**On the (Im)Possibility of Business Ethics** Minka Woermann,2012-11-02 Corporations and the environments in which they operate are complex with changing multiple dimensions and an inherent capacity to evolve qualitatively A central premise of this study is that a postmodern reading of ethics represents an expression of and an engagement with the ethical complexities that define the business landscape In particular the deconstructive philosophy of Jacques Derrida offers a non trivial reading of a complex notion of ethics and thereby helps us to develop the skills necessary to critique and intervene in our practices and to develop robust strategies for living in the absence of prescriptive ethical frameworks Although a central premise of this study is that substantive ethical claims can only be generated within a given context the study nevertheless presents readers with a meta position that illustrates the type of considerations that should inform ethical reflection from a complexity perspective In order to illustrate the value that this meta position holds for business ethics these considerations are explored in terms of the implications that they hold for our understanding of corporate social responsibility for the practice of responsible management and leadership practices and for teaching business ethics
