The Past Before Us M. Kammen, 1996 **The Past Before Us** Michael G. Kammen, American Historical Association, 1980 Is there a distinctive American style of historical scholarship To what extent have quantitative methods and computer technology affected the writing of history Has descriptive history been supplanted by analytical history What constitutes adequate historical explanation These are just a few of the questions addressed in *The Past Before Us* The contributors twenty one distinguished historians discuss the state of their profession today and describe their interests activities and problems Reflecting new and exciting trends in historical research their essays taken together provide a searching assessment of the major advances in historical methods as well as in historical knowledge during the 1970s Jacket

Historians in Public Ian Tyrrell, 2005-12 From lagging book sales and shrinking job prospects to concerns over the discipline's narrowness myriad factors have been cited by historians as evidence that their profession is in decline in America Ian Tyrrell's *Historians in Public* shows that this perceived threat to history is recurrent exaggerated and often misunderstood In fact history has adapted to and influenced the American public more than people and often historians realize Tyrrell's elegant history of the practice of American history traces debates beginning shortly after the profession's emergence in American academia about history's role in school curricula He also examines the use of historians in and by the government and whether historians should utilize mass media such as film and radio to influence the general public As *Historians in Public* shows the utility of history is a distinctive theme throughout the history of the discipline as is the attempt to be responsive to public issues among pressure groups A superb examination of the practice of American history since the turn of the century *Historians in Public* uncovers the often tangled ways history makers make history both as artisans and as actors

Growing Up in America N. Ray Hiner, Joseph M. Hawes, 1985 *Growing Up in America* offers substantial and dramatic evidence that the history of childhood has come of age Its authors demonstrate the breadth and depth of interest as well as high quality of work in a field that is finally attracting the attention it deserves Strongly influenced by new social history and its concern for the powerless and inarticulate *Growing Up in America* provides illuminating insights on children from infancy to adolescence and from the colonial period to present The very title of this fine and enormously instructive anthology of essays makes its quiet but important point that children grow up in a particular nation rather than in a family or home isolated from the influence of social cultural political and historical forces An admirably diverse and instructive collection Georgia Historical Quarterly **Encyclopedia of Historians and Historical Writing** Kelly Boyd, 2019-10-09 The *Encyclopedia of Historians and Historical Writing* contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate

Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

Rethinking U.S. World Power Daniel Bessner, Michael Brenes, 2024-03-06 Since the late 1990s diplomatic historians have emphasized the importance of international and transnational processes flows and events to the history of the United States in the world Rethinking U S World Power provides an alternative to these scholarly frameworks by assembling a diverse group of historians to explore the impact of the United States and its domestic history on U S foreign relations and world affairs In so doing the collection underlines that even in a global age domestic politics and phenomena were crucial to the history of U S foreign policy and international relations more broadly

Memory, Identity, Community Lewis P. Hinchman, Sandra K. Hinchman, 1997-04-17 This anthology documents the resurrection in the last few decades of the importance of narrative to the study of individuals and groups The editors propose that the human sciences are undergoing a paradigm shift away from nomological models and toward a more humanistic language in which narrative plays a complex and controversial role Narratives they claim help to make experience intelligible to crystallize personal identity and to constitute and nurture community The fifteen articles in this collection organized into sections dealing with memory identity and community are by noted scholars representing a wide variety of disciplines including philosophy history religion communication environmental studies political science sociology anthropology psychology and law They advocate diverse political and ideological positions supporting the editors belief that because narrative has not been captured by any academic bloc it has the potential to become a lingua franca of future debates in the human sciences

That Noble Dream Peter Novick, 1988-09-30 The evolution of the idea and ideal of objectivity is traced over the past century from a selection of unpublished as well as published writings of hundreds of American historians

Democratic Communications James Frederick Hamilton, 2008-01-01 This is the first book to take issue with the long standing assumptions about alternative media and democratic communications and place them in a detailed cultural and historical context Ranging from prophecy in sixteenth century England to the self managed projects of critical literacy and social change of today it assesses the historical heritage present conditions and future possibilities of today s remade media landscape for democratic communications

A Revolt Against Liberalism A.A.M. van der Linden, 2023-04-12 This is the first study to provide a comprehensive picture of the revolt brought about by American radical historians in the 1960s and 1970s With the turbulent sixties as a backdrop the work of radical luminaries like Eugene Genovese Herbert Gutman Staughton Lynd William Appleman Williams and Howard Zinn is discussed These historians made a significant contribution to present day notions about slavery working class history the New Deal the Cold War and a wealth of other subjects Their main target was American liberalism Radical criticism centered on the liberal concepts of the division of power and of the nature of man The acrimonious debate which ensued tore the

historical profession apart Therefore most historians have stressed the disagreements between liberals and radicals Yet in this study it will be argued that in some respects the radicals were part and parcel of mainstream historiography though they presented a radical version of it
