He supplies the right ingredients, earning the respect and trust of his team with a blend of integrity, partnership and affirmation. Ultimately, it is recognised that there is more to effective leadership than a wonder pill. AZIMUTH Check John P. Steele, 2009. Enhancing the leadership skills of Soldiers is of primary importance to the U.S. Army. A critical step in the process of leader development is self-awareness through self-assessment. Such insight is important because identifying and assessing trainable competencies that facilitate maximum leadership effectiveness creates a strategic advantage. This report describes the psychometric properties and common competencies assessed by the Leader AZIMUTH Check, a 360-degree feedback instrument for Army leaders. The AZIMUTH was designed and implemented by the Army Research Institute (ARI) to improve leader common competency development, leader-directed feedback, and enhance leader self-awareness. The purposes of the present research project were to establish a factor structure of common competencies, the minimum number of raters required for adequate reliability, conceptual agreement across rating sources, rating patterns and behaviors, and validity evidence of the AZIMUTH DTIC.
