Christ of the Coal Yards Harry Eiss, 2010-02-19 No one heard the shot No one ever found the gun It was Sunday July 27 1890 Vincent had recently finished Wheatfield with Crows thought to be his final painting one that he described as representing vast fields of wheat beneath troubled skies one where he said in a letter he meant to send to Theo I did not need to go out of my way to try to express cheerlessness and extreme loneliness The letter never got sent but was found stuffed in his smock That morning as usual he walked out into the wheat fields with his easel brushes tubes of color and folding stool perhaps hoping to reach his destination before the gang of local boys and girls were up and able to tease him and throw tomatoes Le Crau a wide plain of ripe grain fields of citron yellow tan and ochre spread out beneath the bright Provencal sun It's safe to assume he heard the cicadas singing loudly the swiping swishes of the farmers scythes already cutting through the rich wheat stalks the gusts of wind whispering through the olive branches Driven and filled with energy for months he had been quickly with an assurance that overcame and perhaps even came from his doubts and struggles putting his own dramatic visions on canvas after canvas But today he did not go into the fields to paint or perhaps in the beginning he did perhaps in the morning that was his intention No one will ever know He said he brought the revolver to frighten off the crows Possibly that was his original

intention when he included it with his lunch of bread and milk In the end it s probably not relevant except for the endless attempts to analyze him to dig into his complex psyche at once brilliant and yet impelled to self destruction The Ravoux family were sitting on the terrace of their caf when he returned a bit concerned because he was late but not overly so When he finally appeared his walk was more uneven than usual and he held his hand over his stomach Monsieur Vincent Mrs Ravoux said we were worried we are glad to see you come Has anything bad happened No but I he left his reply unfinished as he passed inside Mr Ravoux followed him upstairs where he found him sitting on his bed facing the wall I wanted to kill myself This book is a critical examination of Vincent van Gogh that offers insights into his life his religious beliefs his relationships with women and of course his paintings It includes discussions of his letters and responds to many of the previous works about him dispelling some of the myths that have no foundation and pointing out how many of the claims made about him and many of the popular beliefs that have grown up around him are at best guesswork It explores psychological neurological theological philosophical aesthetic and historical paradigms for comprehending his enigmatic and enticing personality

Van Gogh A Beg Guide Andrew Forrest,2012-07-27 Vincent Van Gogh had a profound gift of communication and he remains an icon of modern art to this day This book will explore Van Gogh s life influences English connections painting techniques perceptions of Van Gogh and the continuing Van Gogh phenomenon

Leonardo da Vinci William Shakespeare Isaac Newton Ludwig von Beethoven and Albert Einstein Who among us hasn't read Hamlet listened to the Fifth Symphony gazed at the Mona Lisa or marveled at the three laws of physics and the Theory of Relativity and been struck with the same simple question how on Earth did they do it Where did these masters draw inspiration to produce some of the most stunning achievements in human history Were their brains wired differently than ours Did they have special traits or unique experiences that set them on the path to greatness Genius is a broad and elusive concept one that is divisive and hard to define and gravely misunderstood There are ordinary geniuses who achieve remarkable feats of brilliance as well as magicians a term James Gleick invoked to describe Richard Feynman who make an outsized impact on their given field But highest among them are transformative geniuses those rare individuals who redefine their fields or open up new universes of thought altogether These are the masters whose genius Bulent Atalay decodes in his engrossing enlightening and revelatory book No Atalay doesn't have a road map for how we might become the next Einstein or Leonardo but his revolutionary study of genius gives us a stunning new lens through which to view humanity's most prolific thinkers and creators and perhaps pick up some inspiration along the way At first it seems that transformative geniuses don't follow any sort of topography Their prodigious output looks effortless they leap from summit to summit and they probably couldn't explain exactly how they went about solving their problems They might not even recognize themselves in the ways we talk about them today Atalay argues that these heroes fit more of a mold than we might think As evidence he rigorously dissects the lives traits habits and thought patterns of five exemplars Leonardo Shakespeare Newton Beethoven and Einstein to map the path of the transformative genius How did Beethoven who could not perform basic multiplication innately encode the Fibonacci Sequence in his symphonies Is it possible that we understate Shakespeare's poetic influence How did Leonardo become equally prolific in both the arts and the sciences How did Newton formulate the universal laws of physics the basis of so many other sciences And what prompted TIME Magazine to declare Einstein a man whose very name is synonymous with genius the Individual of the 20th Century With great clarity and attention to detail Atalay expertly traces how these five exemplars ascended to immortality and what their lives and legacies reveal about how transformative geniuses are made
