Summary of Investigations ,1955 **The Art of Mechanical Reproduction** Tamara Trodd,2015-09-25 The Art of Mechanical Reproduction presents a striking new approach to how traditional art mediums painting sculpture and drawing changed in the twentieth century in response to photography film and other technologies Countering the modernist view that the medium provides advanced art with resistance against technological pressures Tamara Trodd argues that we should view art and its practices as imaginatively responding to the potential that artists glimpsed in mechanical reproduction putting art into dialogue with the commercial cultures of its time The Art of Mechanical Reproduction weaves a rich history of the experimental networks in which artists as diverse as Paul Klee Hans Bellmer Ellsworth Kelly Robert Smithson Gerhard Richter Chris Marker and Tacita Dean have worked and it shows for the first time how extensively technological innovations of the moment have affected their work Original and broad ranging The Art of Mechanical Reproduction challenges some of the most respected and entrenched criticism of the past several decades and allows us to think about these artists anew
