Opening Pandora's Box G. Nigel Gilbert, Michael Mulkey, 1984-02-23 This book proposes a fresh approach to sociological analysis and in particular to the analysis of scientific culture It moves away from previous studies which have tended to focus on scientists actions and beliefs to show that analysis of scientific discourse can be productive and revealing The book

demonstrates that scientists produce varying accounts of their actions and beliefs in different social situations Rather than attempting to extract one coherent interpretation from these diverse accounts the study identifies two basic scientific repertoires and shows how scientists use them to create their discourse This provides a point of departure for more complex analytical topics Discourse analysis is applied to show how different degrees of consensus can be ascribed to the same group of scientists at a given moment in time through the application of standard interpretive techniques Finally discourse analysis is used to explore scientists humour a neglected topic that is shown to provide important insights into the normally hidden interpretive regularities which underlie the cultural diversity of science

Biopsychosocial Factors in Obstetrics and Gynaecology Leroy C. Edozien, P. M. Shaughn O'Brien, 2017-08-24 This text covers the wide spectrum of biopsychosocial factors integral to all aspects of obstetrics gynaecology and women's health

On Folk Epistemology Mikkel Gerken, 2017-09-15 On Folk Epistemology explores how we ascribe knowledge to ourselves and others Empirical evidence suggests that we do so early and often in thought as well as in talk Since knowledge ascriptions are central to how we navigate social life it is important to understand our basis for making them A central claim of the book is that factors that have nothing to do with knowledge may lead to systematic mistakes in everyday ascriptions of knowledge These mistakes are explained by an empirically informed account of how ordinary knowledge ascriptions are the product of cognitive heuristics that are associated with biases In developing this account Mikkel Gerken presents work in cognitive psychology and pragmatics while also contributing to epistemology For example Gerken develops positive epistemic norms of action and assertion and moreover critically assesses contextualism knowledge first methodology pragmatic encroachment theories and more Many of these approaches are argued to overestimate the epistemological significance of folk epistemology In contrast this volume develops an equilibristic methodology according to which intuitive judgments about knowledge cannot straightforwardly play a role as data for epistemological theorizing Rather critical epistemological theorizing is required to interpret empirical findings Consequently On Folk Epistemology helps to lay the foundation for an emerging sub field that intersects philosophy and the cognitive sciences The empirical study of folk epistemology

Pandora's Risk Kent Osband, 2011 Author of the acclaimed work *Iceberg Risk: An Adventure in Portfolio Theory* Kent Osband argues that uncertainty is central rather than marginal to finance Markets don't trade mainly on changes in risk They trade on changes in beliefs about risk and in the process markets unite stretch and occasionally defy beliefs Recognizing this truth would make a world of difference in investing Belittling uncertainty has created a rift between financial theory and practice and within finance theory itself misleading regulation and stoking huge financial imbalances Sparking a revolution in the mindset of the investment professional Osband recasts the market as a learning machine rather than a knowledge machine The market continually errs corrects itself and makes new errors Respecting that process without idolizing it will promote wiser investment trading and regulation With uncertainty embedded at its core Osband's rational approach points to a finance

theory worthy of twenty first century investing MCOs for Critical Care Dr. Priyanka Gupta Manglik,2024-08-15 A dedicated question bank for students and professionals in critical care medicine covering ICU protocols emergency management and ventilatory support systems **Pandora's Dilemma** David Stoesz,2018 Pandora s Dilemma presents theories of social welfare addressing stakeholders the policy process electoral politics child welfare the precariat online education the devolution of the welfare state and the evolution of the investment state **Pandora's Box** Geoffrey Newton,2023-05-05 This book is about the coronavirus and the pandemic it spawned and what this outbreak means for future pandemics It analyses the official response and sees where improvements can be made for example the World Health Organization waited till March to designate the coronavirus a pandemic and a full year before confirming its airborne transmission The book looks at the specific nature of the virus its origins and how it was transmitted why it was so deadly to predisposed individuals how it compares to previous pandemics what measures were taken mitigate the disease and how to protect ourselves against it in future The book also looks into the wider implications of the pandemic and its causes for example how climate change and biodiversity are coming into direct conflict with ever expanding needs of population growth and urban sprawl has conspired to bring us into ever closer contact with these viruses for example Nipah virus outbreak from the deforestation of the Indonesian Rain Forest and Ebola from settlement expansion in the Congo Lastly the book looks at the wider nature of viruses and their historical significance to the tree of life of the planet and their relationship to our evolution This book is a timely search into the nature of viruses and how they will affect us going forward and what measures we can take to protect ourselves and mitigate the dangers from future outbreaks by integrating our industrial society into an ecological friendly setting thereby accommodating these viruses
