The New Penguin World Atlas Oxford University Press,1979-01-01 *Reference and Information Services* Richard E. Bopp,Linda C. Smith,2011-05-23 Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years this new fourth edition of *Reference and Information Services* takes the introduction to reference sources and services significantly beyond the content of the first three editions In Part I Concepts and Processes chapters have been revised and updated to reflect new ideas and methods in the provision of reference service in an era when many users have access to the Web In Part II Information Sources and Their Use discussion of each source type has been updated to encompass key resources in print and on the Web where an increasing number of freely available sources join those purchased or licensed by libraries A number of new authors are contributors to this new edition bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries Discussions of services in Part I integrate digital reference as appropriate to each topic such as how to conduct a reference interview online using instant messaging Boxes interspersed in the text are used to present scenarios for discussion to highlight key concepts or to present excerpts from important documents Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources Each chapter concludes with an updated list of additional readings to guide further study A new companion website will provide links to Web accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text **The State of the World Atlas** Dan Smith,2021-02-09 The State of the World Atlas is an accessible unique visual survey of current events and global trends highlighting the international scope and complexity of many challenges facing the humanity today With a bold new design this distinctive atlas presents the latest statistics on international trade and migration the globalization of work aging and new health risks up to and including the COVID 19 pandemic food and water energy resources and consumption literacy gender equality wars and peacekeeping and more And for the newest edition special attention has been brought to the way that all of these issues are affected by the ongoing climate crisis Fascinating troubling and surprising this is an important resource for anyone who seeks to better understand the world around them The Penguin World Atlas Oxford University Press,1974 *Global Security Upheaval* Robert Mandel,2013-04-03 This book calls into question the commonly held contentions that central governments are the most important or even the sole sources of a nation s stability and that subnational and transnational nonstate forces are a major source of global instability By assessing recent real world trends Mandel reveals that areas exist where it makes little sense to rely on state governments for stability and that attempts to bolster such governments to promote stability often prove futile He demonstrates how armed nonstate groups can sometimes provide local stability better than states and how power sharing arrangements between states and

armed nonstate groups may sometimes be viable He concludes that these trends in the international setting call for major shifts in our understanding of what constitutes stable governance proposing that we adopt a fluid emergent actor approach And he calls for significant deviation from standard policy responses to the opportunities and dangers posed by nontraditional sources of national authority Dark Logic Robert Mandel,2011 This book constitutes the first major study showing 1 when transnational organized crime is likely to use corruption and violence tactics 2 when transnational criminal activities most affect individual and state security and 3 when the negative consequences of these tactics and activities can be most successfully combated **Connectivity and Global Studies** Jan Nederveen Pieterse,2021-02-19 This textbook provides readers with evocative and analytical accounts of social processes that are linked to globalization and connectivity which includes a wide range of multi centred connections in history DNA analysis technology art populism and political economy Rather than globalization Nederveen Pieterse focuses on connectivity His approach to globalization differs from both structuralist accounts of the world system and the institutionally centred focus of much work in international studies This synthesis will provide a new resource to reconstruct theoretical approaches to globalization and global studies Fluently written clearly organized and with an interdisciplinary approach the book will be accessible to upper division undergraduates and graduates in social sciences including students and researchers from the fields of sociology politics political economy development studies and international relations The New Reference Atlas of the World C.S. Issar,2012-12-06 Many times when the author saw the bedouins of southern Sinai excavate their wells in the crystalline rocks from which this part of the peninsula is built the story of Moses striking the rock to get water came to mind The reader will indeed find in this book the description for a rather simple method by which to strike the rock to get water in the wilderness of Sinai Yet this method was not invented by the author nor by any other modern hydrogeologist but was a method that the author learned from the bedouins living in the crystalline mountains of southern Sinai These bedouins belonging to the tribe of the Gebelia the mountain people live around the monastery of Santa Katerina and according to their tradition which has been confirmed by historical research were once Christians who were brought by the Byzantine emperor Justinian from the Balkans in the 6th century A D to be servants to the priests of the monastery They know how to discern places where veins of calcite filled the fractures of the granites such places are a sign of an extinct spring They also know how to distinguish an acid hard

granite rock and hard porphyry dike from a soft diabase dike. The latter indicated the location at which they should dig for water into the subsurface. In Chapter 9 the reader will find a detailed description of how they used this knowledge to extract water from the rock.
