

The Peritoneum

Armando Rossi, Giorgio Rossi

The Peritoneum:

The Peritoneum Arthur Emanuel Hertzler, 1919 CT of the Peritoneum Armando Rossi, Giorgio Rossi, 2012-12-06 I have not embarked on the foreword to this scientific monograph by Armando and Giorgio ROSSI in the expectation that it will be an easy task because these two authors are the last remaining members of a family that has left its mark in the field of radiology in our country therefore the writer's enthusiasm and detachment could be jeopardized by memories of his own teachers and elders and the respect he still feels towards them The line stretches from Armando Rossi Sr a pioneer in the field of radiology in Italy a scientist and a versatile teacher a student of Beclere and Busi to Lucio Rossi an eminent teacher a learned man and a gentleman An official biography of Armando Rossi shows that in his last years his wide didactic interests were directed towards his own family leading him to devote his attention to those of his grandchildren who were then getting ready to embrace the medical profession *Exploring Drug Delivery to the Peritoneum* Ranjita Shegokar, 2023-11-30 The Peritoneal cavity PC is the key metastatic site for intra abdominal malignancies e.g. GI tract and rectal cancer PC sites can be used to target several other diseases where lymphatic drug delivery is desired without dumping large amounts of the drug Till recently it was thought that treatment with curative intent was impossible but that was challenged by the introduction of cytoreductive surgery CRS and heated intraperitoneal chemotherapy HIPEC and PIPAC pressurized intraperitoneal aerosol chemotherapy Recently a growing number of preclinical and clinical studies advocate intraperitoneal IP chemotherapy as an alternative post operative therapy for cancer Although their effectiveness has been proven both experimentally and clinically there is still little understanding of the role of drug delivery systems DDS in targeting drugs in the intraperitoneal IP cavity There are two main challenges one posed by IP cavity where the residence time of a small molecular weight drug 20 kDa is not sufficiently long to maintain therapeutic effect This leads to frequent or continuous dosing Another challenge is device related or catheter related problems such as catheter obstruction increased risk of infection and bowel complications Overall literature shows that the IP site is satisfactorily explored by clinicians but in terms of drug delivery not that much One can see a clear cut gap of expertise exchange between the two fields and guidelines from regulatory lawmakers on new medications ppbr ppbr In summary challenges like delivery to IP cavity tumor or organ specific targeting efficient tissue penetration optimal cellular uptake and intracellular residence of a drug biocompatibility toxicity etc can be easily solved by smartly designing functional drug delivery systems both nano and micro Nanotechnologies have always fascinated humans for several decades and are now widely explored in the biomedical field Diverse types of nanoparticles are being explored around the world some examples include biodegradable nanoparticles green nanoparticles polymeric nanoparticles lipid nanoparticles metal nanoparticles graphene carbon nanotubes and several others Now a day's nanoparticles are gaining interest for drug targeting of chemotherapeutic drugs immunotherapy and gene delivery Whereas microparticles can be explored for delayed drug delivery to the peritoneal cavity due to relatively slow removal from IP fluid Hydrogels or other

adhesive drug delivery may help to enhance peritoneal adhesions thereby maintaining the balance between benefit and risk Overall drug delivery systems are key in IP targeting That means drug delivery specialist and clinician needs to be connected to get the best out of this route of drug administration ppbr ppThe present book is a link between pharmaceutical scientists drug formulators clinicians toxicologists and regulatory experts This book also provides a new perspective to researchers to divert or guide their research in an optimal way Exploring Drug Delivery to the Peritoneum serves as a platform for upcoming technologies especially in the medical devices sector to face up and show potential in delivering drugs It is a chance for commercial partners like insurance companies and the pharma industry to explore this direction pp pp

Textbook of Peritoneal Dialysis R. Gokal,2000 In 1994 the expert knowledge of Ram Gokal and Karl D Nolph the two foremost figures in the field of peritoneal dialysis was combined to produce the first edition of the Textbook of Peritoneal Dialysis The work quickly became recognised as the gold standard for those working in the field Since its conception however our understanding of peritoneal dialysis related physiology kinetics and clinical outcomes as well as the concepts of intraperitoneal chemotherapy has increased sufficiently to make an updated and completely revised edition of the work necessary An expansion of the editorial team by fellow experts Ramesh Khanna and Raymond Krediet enabled an even more comprehensive approach to be taken This second edition reasserts the book s uniqueness in its detailed discussion of the topic making it required reading for all those working within the field of peritoneal dialysis **On the Fabric of the Human Body** Andreas Vesalius,John Burd Carman,2007 **The Anatomy and Physiology of the Human Body** John Bell,1822 Index-catalogue of the Library of the Surgeon-General's Office, United States Army Library of the Surgeon-General's Office (U.S.),1908 A System of Dissections Explaining the Anatomy of the Human Body, the Manner of Displaying the Parts, and Their Varieties in Disease Charles Bell,1810 **The Practice of Medicine, a Treatise on Special Pathology and Therapeutics.
