Sinkholes And The Engineering And Environmental Impacts Of Karst Geotechnical Special Publication No 144:

Karst Hydrogeology and Geomorphology Derek Ford, Paul D. Williams, 2013-05-03 Originally published in 1989 Karst Geomorphology and Hydrology became the leading textbook on karst studies This new textbook has been substantially revised and updated The first half of the book is a systematic presentation of the dissolution kinetics chemical equilibria and physical flow laws relating to karst environments It includes details of the many environmental factors that complicate their chemical evolution with a critique of measurement of karst erosion rates The second half of the book looks at the classification system for cave systems and the influence of climate and climatic change on karst development The book ends with chapters on karst water resource management and a look at the important issues of environmental management including environmental impact assessment environmental rehabilitation tourism impacts and conservation values Practical application of karst studies are explained throughout the text This new edition strengthens the book's position as the essential reference in the field Karst geoscientists will not dare to stray beyond arm's reach of this volume It is certain to remain the professional standard for many decades *Journal of Cave and Karst Studies* August 2007

Site Characterization in Karst and Pseudokarst Terrains Richard C. Benson, Lynn B. Yuhr, 2015-09-24 This book provides a practical strategy for obtaining a more complete and accurate geologic site characterization The strategy and methods to characterize complex geologic settings are readily available The strategy utilizes readily available technology basic science and good old fashioned common sense resulting in a solid understanding of geologic and even karst or pseudokarst conditions We provide an introduction to many off the shelf methods available for site characterization as well as examples of their application throughout the book The purpose of a geologic site characterization is to understand the 3 dimensional geologic framework along with the engineering and hydrologic properties of a site including any man made impacts A well done site characterization is the cornerstone of all geotechnical groundwater and environmental projects The geologic conditions particularly karst conditions can significantly impact a site including its structural stability groundwater pathways and potential for rapid transport or traps for contaminants Once we have adequately characterized the geologic conditions can we carry our remediation design and construction model flow and make risk assessments that are accurate and reliable

Atlas of Karst Collapses Mingtang Lei, Wanfang Zhou, Xiaozhen Jiang, Jianling Dai, Meng Yan, 2022-01-19 This book comprehensively documents the various types of karst collapse and related conceptual site models before discussing these collapses in terms of their impacts on engineering and the environment Featuring over 200 real world photos to illustrate the variety of karst collapses and their consequences the book also provides specific methods and techniques to prevent investigate monitor and remediate these collapses Decades of experience with these collapses make it clear that addressing the related hazards requires a multi disciplinary approach that integrates geomorphology engineering geology hydrology hydrogeology biology geophysics geochemistry and risk assessment
