believe for the study of the complex phenomenon like academic writing no single method or tool can suffice Therefore we strongly recommend a more creative perspective in data collection and analyzing and interpreting academic writing Papers can present quantitative data analyses based on experimental design or qualitative data analyses stemmed from more ethnographic oriented research Systematic review studies are also welcome We encourage contributions related but not restricted to the following topics 1 Cognitive processes in academic texts planning composing and revisions and student writers individual differences 2 Metacognition and self regulation in academic texts planning composing and revisions and student writers individual differences 3 Motivation and self efficacy in academic texts planning composing and revisions and student writers individual differences 4 Linguistic and rhetorical choices identity construction and disciplinary knowledge construction 5 Student writers textual production peer feedback and interactions with discourse communities 6 Affordances and challenges of artificial intelligence AI in the process of academic textual production in higher education *Teach Business English* Sylvie Donna,2000-07-27 This book provides a practical introduction to Business English for new and experienced teachers and deals with a range of issues from needs analysis and course planning to testing and evaluation
