representations of the sleeping body in fiction from 1800 to the present day which traces the ways in which novelists have engaged with this universal indispensable but seemingly nondescript region of human experience Covering the narrativization of sleep in Austen the politicization of sleep in Dickens the queering of sleep in Goncharov the aestheticization of sleep in Proust and the medicalization of sleep in contemporary fiction it examines the ways in which novelists envision the figure of the sleeper the meanings they discover in human sleep and the values they attach to it It argues that literary fiction harbours on its margins a sleeping partner one that we can nickname the Schlafroman or sleep novel whose quiet absorption in the wordlessness and passivity of human slumber subtly complicates the imperatives of self awareness and purposive action that traditionally govern the novel The Enchantments of Technology Lee Bailey, 2010-10-01 In The Enchantments of Technology Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments embody not only reason but also desires *Proceedings of the 14th International Conference on Sustainable Built Environment* Ranjith Dissanayake, Priyan Mendis, Sudhira De Silva, Shiromal Fernando, Chaminda Konthesingha, Upul Attanayake, Pradeep Gajanayake, 2024-08-27 This book highlights the latest knowledge and innovations in the fields of civil
