Quality of Life and the Millennium Challenge Valerie Møller, Denis Huschka, 2008-11-30 The new millennium is widely considered to be the age of globalisation, democratisation, and human rights. We live in a knowledge society and in a time of risk and uncertainty. World society is rapidly urbanising and ageing and exhausting its natural resources. It is the interplay of such key trends of the era that calls for a fresh approach to measuring quality of life. This collection of papers presents an innovative approach to evaluating living standards and wellbeing under the new circumstances facing individuals and societies in the twenty-first century. Contributions cover a wide range of issues that impact positively and negatively on wellbeing in our age. While stability, trust, equal access to resources, and the social integration of disadvantaged members of society enhance wellbeing, poverty, social exclusion, congestion in cities, HIV/AIDS, and global warming pose threats to both modern and traditional lifestyles. Methodological refinements of conventional measurement tools are presented that take into consideration the rich diversity of lifestyles and values among different populations and regions of the world. This book will be essential reading for social scientists and ordinary citizens who are concerned about the future of human wellbeing on our planet.

Power and Organizations Stewart R Clegg, David Courpasson, Nelson Phillips, 2006-08-07 A marvelous addition to the literature on both organizations and power. It is well grounded in the research on these topics and especially the wide range of relevant theorizing. The book is terrific at bringing together theory, research, and the world of organizations.

George Ritzer, Distinguished University Professor, University of Maryland. This book tirelessly illuminates the nooks and crannies of the power literature, taking readers on an audacious tour of power's multiple conceptualizations and expressions.

Hugh Willmott, Diageo Professor of Management Studies, University of Cambridge. Clegg and his associates expose the power dynamics that lie at the heart of all political and organizational arenas, and in so doing, they shed light on the underbelly along with the creative potentialities in organizational life.

Joyce Rothschild, Professor of Sociology, Virginia Polytechnic Institute and State University. Strange but true: most studies of organizational hierarchies downplay the issue of power or uncritically assume more is better while ignoring its pernicious effects.

Stewart Clegg, David Courpasson, and Nelson Phillips set the record straight. Joanne Martin, Merrill Professor of Organizational Behavior, and by

courtesy Sociology Stanford University Graduate School of Business Stanford In this tour de force Stewart Clegg David Courpasson and Nelson Phillips provide a comprehensive account of power and organizations unlocking power as the central relation of modern organizations and society The authors present an excellent synthesis of organization social and political theory to offer an overview of power and organizations that is historically informed addresses current issues and is comprehensive in scope Power and Organizations reviews the evolution of theories on power and organization presenting not only the theorists who identify power as positive but also dealing with the negativity of power and the real horror of which organizations are capable which has thus far been underplayed in organization theory At the core of organizational power projects are organizational elites whose politics and projects are examined extensively in the book The book concludes by examining the implications for organizations and their elites of the trends tendencies and theories considered in the course of the book This book is required reading for graduate students and researchers in areas such as organizational social and political theory

Law in Transition Ruth Buchanan, Peer

Zumbansen, 2014-12-01 Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and practice has been both celebrated and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels
