Sociology Full Circle William Feigelman, 1976 **Sociology Full Circle** William Feigelman, Unhastening Science Dick Pels, 2003-01-01 This book offers a new account of what makes science special among other human pursuits critically engaging with a variety of approaches especially constructivist and relativist studies of science and technology It focuses on the studied lack of haste of science its relative freedom from stress and its socially sanctioned withdrawal from the swift pace of ordinary life Unhastening Science offers a balanced and thoughtful argument which emphasizes the dangers of cossetting science from the scourge of internal competition while at the same time highlighting the need for distance between the process of scientific thought and the faster machinery of politics business sports and the media **Sociology** John Bascom, 1887 Science for Agriculture Wallace E. Huffman, Robert E. Evenson, 2008-02-28 Science for Agriculture was the first thorough quantitative and analytical treatment of the history of the U S agricultural research system and as such has served as the foundation for research over the 10 years since its publication The benefits from public and private investment in agricultural research are immense and should be understood by every student of the agricultural science system in the United States The second edition updates important landmarks components characteristics and trends of the U S system for developing and applying science to increase the productivity and advancements of agriculture Science for Agriculture 2e is essential reading for agriculture educators and researchers Land Grant administrators food and agri industry R D and all others who need to understand the factors that will influence future public agricultural research policy

Ethnomethodology's Program Harold Garfinkel, 2002-06-11 Since the 1967 publication of *Studies in Ethnomethodology* Harold Garfinkel has indelibly influenced the social sciences and humanities worldwide This new book the long awaited sequel to *Studies* comprises Garfinkel's work over three decades to further elaborate the study of ethnomethodology Working out Durkheim's Aphorism the title used for this new book emphasizes Garfinkel's insistence that his position focuses on fundamental sociological issues and that interpretations of his position as indifferent to sociology have been misunderstandings Durkheim's aphorism states that the concreteness of social facts is sociology's most fundamental phenomenon Garfinkel argues that sociologists have for a century or more ignored this aphorism and treated social facts as theoretical or conceptual constructions Garfinkel in this new book shows how and why sociology must restore Durkheim's aphorism through an insistence on the concreteness of social facts that are produced by complex social practices enacted by participants in the social order Garfinkel's new book like *Studies* will likely stand as another landmark in sociological theory yet it is clearer and more concrete in revealing human social practices *The Aesthetic Dimension of Visual Culture* Jakub Stejskal, 2010-08-11 How can aesthetic enquiry contribute to the study of visual culture There seems to be little doubt that aesthetic theory ought to be of interest to the study of visual culture For one thing aesthetic vocabulary has far from vanished from contemporary debates on the nature of our visual experiences and its various shapes a fact especially

pertinent where dissatisfaction with vulgar value relativism prevails Besides the very question ubiquitous in the debates on visual culture of what is natural and what is acquired in our visual experiences has been a topic in aesthetics at least since the Enlightenment And last but not least despite attempts to study visual culture without employing the concept of art there is no prospect of this central subject of aesthetic theory ebbing away from visual studies The essays compiled in this volume show a variety of points of intersection and involvement between aesthetics and visual studies some consider the future of visual art some the conditions and characteristics of contemporary visual aesthetic experience while others take on the difficult question of the relation between visual representation and reality What unites them is their authors willingness to think about contemporary visual culture in the conceptual frame of aesthetics This book will be of great interest to students and scholars of philosophical aesthetics art history and cultural studies
