New Approaches in Software Measurement Reiner Dumke, Alain Abran, 2003-06-29 Software measurement is one of the key technologies employed to control and manage the software development process Research avenues such as the applicability of metrics the efficiency of measurement programs in industry and the theoretical foundations of software engineering have been investigated to evaluate and improve modern software development areas such as object orientation compone based develop ment multimedia systems design reliable telecommunication systems etc In the tradition of our software measurement research communities the German Computer Science Interest GI Group on Software Measurement and the Canadian Interest Group in Software Metrics CIM have attended to these concerns in recent years Initially research initiatives were directed at the definition of new methods of software measurement and the validation of these methods themselves This was then followed by more and more investigation into practical applications of software measurement and key findings in this area of software engineering have been published in Dumke Zuse Theory and Practice of Software Measurement 1994 Ebert Dumke Software Metriken in der Praxis 1996 Lehner Dumke Abran Software Metrics Research and Practice in Software Measurement 1997 Dumke Abran Software Measurement Current Trends in Research and Practice 1999 We would also like to mention that the proceedings of the Lac Sup rieur workshop have been made available on the web at www.lrgl.uqam.ca This new book includes the proceedings of the 10th Workshop on Software Measurement held in Berlin in October 2000

The Oxford Handbook of Austrian Economics Peter J. Boettke, Christopher J. Coyne, 2015-09-01 The Austrian School of Economics is an intellectual

tradition in economics and political economy dating back to Carl Menger in the late 19th century Menger stressed the subjective nature of value in the individual decision calculus Individual choices are indeed made on the margin but the evaluations of rank ordering of ends sought in the act of choice are subjective to individual chooser For Menger the economic calculus was about scarce means being deployed to pursue an individual's highest valued ends The act of choice is guided by subjective assessments of the individual and is open ended as the individual is constantly discovering what ends to pursue and learning the most effective way to use the means available to satisfy those ends This school of economic thinking spread outside of Austria to the rest of Europe and the United States in the early 20th century and continued to develop and gain followers establishing itself as a major stream of heterodox economics The Oxford Handbook of Austrian Economics provides an overview of this school and its theories The various contributions discussed in this book all reflect a tension between the Austrian School's orthodox argumentative structure rational choice and invisible hand and its addressing of a heterodox problem situations uncertainty differential knowledge ceaseless change The Austrian economists from the founders to today seek to derive the invisible hand theorem from the rational choice postulate via institutional analysis in a persistent and consistent manner Scholars and students working in the field of History of Economic Thought those following heterodox approaches and those both familiar with the Austrian School or looking to learn more will find much to learn in this comprehensive volume

The Digital Challenge Shirin Madon, S Krishna, 2018-02-06 This title was first published in 2003 Information and communication technologies ICTs are increasingly being recognized as vital to the economic growth and global inclusion and participation of developing countries This book brings together both academics and practitioners to provide a comprehensive and insightful overview of ICT and development around the world It examines the role of IT in providing new economic and industrial opportunities in increasing access to global information and communication in assisting small cultural and ethnic groups to overcome disadvantages of physical distance and in catalysing initiatives towards democratic decentralization and empowerment of citizens It also critically appraises major problems such as inappropriate focus and resource allocation and of missed opportunities By combining comparative case studies from Africa South and East Asia South America and Eastern Europe with theoretical analysis this volume synthesizes a range of issues related to the evident tensions that exist for developing countries as they try to balance global and local priorities through the adoption and use of ICTs

Understanding Ludwig Lachmann's Economics Virgil Henry Storr, Solomon M. Stein, 2024-02-01 Ludwig Lachmann is a central but underappreciated figure within the Austrian school of economics Although his understanding of institutions his appreciation of the heterogeneity of capital his emphasis on subjectivity and his focus on the dynamism and uncertainty of the real world have become dominant positions amongst Austrian economists he is still viewed as something of an outsider As such the contributions of Lachmann's economics are arguably misunderstood This Element attempts to tease out and discuss the critical contributions of Lachmann's economics Arguably

one way in which to understand Lachmann's economics is by seeing it as unified in considering in various ways a single conceptual problem: the apparent tension between the dynamic nature of social reality and the intelligible nature of the social world. Approaching Lachmann with this theme in mind allows us to put things together more coherently than other exegetical strategies.

Media, Technology, and Copyright Michael A. Einhorn, 2005-01-01 Recommended reading for any person interested in the way new technologies above all the internet and digital content are affecting the legal treatment of copyrightable intellectual property and related business methods and practices

Online Communities and Open Innovation Linus Dahlander, Lars Frederiksen, Francesco Rullani, 2014-07-16 The advent of Internet marked a significant change in how users and customers can be involved in the innovative process. History is rife with examples of how users innovate, but Internet and its associated communication technologies brought radically new means for individuals to interact rapidly and at little cost in communities that spur new innovations. These communities are initiated and governed by people that differ in their motivations for taking part and participate to varying degrees. Such communities are outside the immediate control of companies seeking to develop open innovation strategies aimed at harnessing their work. This book brings together distinguished scholars from different disciplines: economics, organization theory, innovation studies, and marketing, in order to provide an improved understanding of how technological as well as symbolic value is created and appropriated at the intersection between online communities and firms. Empirical examples are presented from different industries including software services and manufacturing. The book offers food for thought for academics and managers to an important phenomenon that challenges many conventional wisdoms for how business can be done. This book was published as a special issue of *Industry and Innovation*.

Culture and Economic Action Laura E. Grube, Irigil Henry Storr, 2015-06-29 This edited volume, a collection of both theoretical essays and empirical studies, presents an Austrian economics perspective on the role of culture in economic action. The authors illustrate that culture cannot be separated from economic action, but it
