Fundamentals of Soil Genesis, Classification, and Morphology Description:

Soils are an integral part of ecological and agricultural systems. Soils occur as a continuum across the landscape and their properties change in a predictable fashion both across the landscape and with depth. An understanding of soil morphology and the spatial distribution of soil properties is critical in the land-use decision making process. This two week course will cover topics such as soil morphology, soil forming factors, soil genesis, soil classification, soil mapping, and soil geomorphology.

This course is taught via distance learning, but the instructor will supplement lecture material with additional readings and practical examples to illustrate the concepts and provide practical examples of how the concepts are used in practice. This course is designed to complement the students existing knowledge of soil science and help the student understand the principles behind the Soil Science Performance Objectives, which define the practice of soil science.

Class Schedule/Time:

Orientation will be posted by August 19 for viewing on your own and the Soil Chemistry and Mineralogy portion of the course will be Wednesday August 21 and August 28 (two weeks); the course will conclude on Wednesday, August 28, 2013.

Class times will be 7:00 to 9:00 PM Eastern/ 6:00 to 8:00 PM Central/ 5:00 to 7:00 PM Mountain/ 4:00 to 6:00 PM Pacific.

Most class periods will last the full two hours with a 10 minute break halfway through. The software that is used for the course will allow students to enter questions that they would like the instructor to answer. If there is time at the end of the class, the instructor may use that time to answer questions, but all questions will be answered in writing and then posted on the course website.

To achieve the greatest benefit from this course, students will be expected to spend time attending all the classes, reading any needed supplemental materials, and completing the quizzes. The instructors may be contacted at any time via email with questions or comments.
