Soiling And Cleaning Of Building Facades:

The Soiling and Cleaning of Building Facades L.G.W. Verhoef, 2004-06-02 The report of a comprehensive investigation by RILEM which examines all aspects of the cleaning of facades subject to soiling by both biological and non biological agencies The contributors are international authorities working in this field giving essential advice to all those who need to know how to approach the problems connected with the soiling and cleaning of building facades Soiling and Cleaning of Building Facades International Union of Testing and Research Laboratories for Materials and Structures, International Union of Testing and Research Laboratories for Materials and Structures. Technical Committee 62 SCF., 1988

Historic Building Façades New York Landmarks Conservancy, 1997-04-24 Comprehensive in depth coverage from leading experts in the field A historic building is a fragile resource that requires the finest care Maintenance and rehabilitation of walls and facades call for a thorough understanding of the forces that cause deterioration knowledge of the properties of building materials up to date inspection tools and methods and a solid command of renovation and repair techniques In this complete reference manual recognized experts provide state of the art information and methodologies for the inspection maintenance and restoration of historic buildings of virtually every period style and material Each chapter opens with a general discussion of the facade material and the ways in which structural and decorative elements are vulnerable to an array of environmental forces After a detailed investigation of tools and techniques for inspection the text explores planning issues for the restoration or replacement of facade components Special features include Separate chapters on each major type of building material stone masonry brick masonry terra cotta masonry cast stone mortar concrete cast iron sheet metal and wood An entire chapter on caulks and sealants 35 original line drawings and 43 black and white photos that help visualize technical information Selected success stories from preservation projects across the United States For architects building contractors and owners of historic buildings Historic Building Facades clarifies procedures helps identify sources of deterioration and offers solutions to even the most difficult maintenance and rehabilitation problems It is also an excellent reference for building preservationists architectural historians and students of building design and preservation

Cleaning Historic Buildings: v. 1 Nicola Ashurst, 2016-01-08 What happens to the fabric of a historic building if it is not cleaned What is soiling how does it affect the building What cleaning methods should be used This first of a comprehensive two volume guide addresses these important and controversial questions along with many others and offers practical guidance on appropriate cleaning techniques backed up with useful case study material Based on the author's extensive on site involvement at trial and contract stage in many cleaning and surface repair projects this book examines the various attitudes and current cleaning practices along with the role and need for analysis of substrates and soiling It also offers advice on dealing with special cleaning problems such as the removal of paint graffiti and metallic stains and provides an assessment of the cleaning methods currently available

Stone Mick R. Smith, 1999 Planning and design handbook

on precast building structures FIB - International Federation for Structural Concrete, 1994-05-01 Prevention of Premature Staining in New Buildings Phil Parnham, 2002-11-01 The appearance of ugly staining early in a buildings life ruins an otherwise pleasing appearance tarnishes the image of the owners and gives rise to costly refurbishment works In this book Phil Parnham raises a number of questions that should be considered whenever a new building is being designed or built These are why has staining become so prominent what causes premature staining which parts of new buildings are likely to be affected how can it be avoided By using a number of highly illustrated case studies the author answers these questions and ends by suggesting measures that should be taken by all design and construction professionals to prevent premature staining Cleaning Historic Buildings: Substrates, soiling and investigations Nicola Ashurst, 1994 The first of a two volume set this book addresses questions concerning the cleaning of historic buildings what happens to the fabric of a historic building if it is not cleaned what is soiling and how does it affect the building what cleaning materials should be used

Maintainability Of Facilities: For Building Professionals Chew Yit Lin Michael, 2010-01-08 This book focuses on spearheading the integration of maintainability starting right from the design stage To enable such integration improving the knowledge of maintainability and setting maintainability benchmarks are two key issues These objectives are fulfilled with the development of a comprehensive defect library a material manual and a maintainability scoring system These tools serve to define acceptable standards in design and construction practices thus enhancing long term maintainability of facilities Maintainability of Facilities For Building Professionals aims to improve the standard and quality of design construction and maintenance practices to produce efficient facilities that require minimum maintenance The text covers technical issues related to maintainability of major components of a facility and discusses the implications and selection of materials for high maintainability The target readers are practitioners and students in architecture engineering building real estate construction project management facilities management quantity and building surveying **Stone Cleaning and the Nature, Soiling and Decay Mechanisms of Stone** Robert Gordon's Institute of Technology, 1992 Brings together contributions from a wide range of specialisms and offers perspectives on issues concerning the cleaning and conservation of stone buildings Topics covered encompass not only theoretical and philosophical concerns but also problems of weathering and microbiological damage
