Solar Energy And Building:

Passive Solar Buildings J. Douglas Balcomb, 1992 Describes developments in passive solar technology that will save time energy and resources in planning for the buildings of the future This companion to Passive Cooling and Solar Building Architecture volumes 8 and 9 describes developments in passive solar technology that will save time energy and resources in planning for the buildings of the future It is filled with tips and useful research for architects and designers and includes three substantial chapters on general modeling Passive solar heating works Properly designed and constructed it is cost effective practical comfortable and aesthetic Balcomb s introductory remarks set the tone for the rest of the contributions which describe the considerable record of achievements in passive solar heating Balcomb summarizes and evaluates the era between 1976 and 1983 when most of the major developments took place and highlights the design features that have contributed to effective buildings Three chapters cover modeling passive systems applicable to both heating and cooling and six chapters focus on the application of passive solar heating with emphasis on components analytical results for specific systems test modules subsystem integration into buildings performance monitoring and results and design tools J Douglas Balcomb is a Principal Engineer with the Solar Energy Research Institute *Solar Buildings and Neighborhoods* Caroline Hachem-Vermette, 2020-05-30 This book presents the main principles for designing buildings and neighborhoods with increased potential to capture and utilize solar energy It discusses practical issues in the design of the built environment and their impact on energy performance and a range of design considerations from building components e g the building envelope to urban planning issues e g density and street layouts In addition to design guidelines on how to increase buildings potential to capture solar energy the book provides creative tips to increase the aesthetic value of solar technology integration in buildings Helping readers plan energy efficient buildings with innovative building envelope technologies and to understand the impact of early stage design considerations on the energy performance of buildings and communities the book offers a valuable source of information for building professionals including architects engineers and urban planners It can also serve as a reference guide for academics and students of energy efficiency in buildings and urban planning

Solar Energy Andy Walker, 2013-08-07 Solar Energy is an authoritative reference on the design of solar energy systems in building projects with applications operating principles and simple tools for the construction engineering and design professional The book simplifies the solar design and engineering process providing sample documentation and special tools that provide all the information needed for the complete design of a solar energy system for buildings to enable mainstream MEP and design firms and not just solar energy specialists to meet the growing demand for solar energy systems in building projects

Passive Solar Energy in Buildings P. O'Sullivan, 2003-09-02 This report indicates that the benefits that accrue to a building and its occupants from a consideration of solar radiation are greatest when the passive solar component is seen in perspective as a natural part of an integrated approach to climatically interactive low energy building design Solar

Technologies for Buildings Ursula Eicker, 2006-08-14 A complete overview of solar technologies relevant to the built environment including solar thermal energy for heating and cooling passive solar energy for daylighting and heating supply and photovoltaics for electricity production Provides practical examples and calculations to enable component and system simulation e.g. Calculation of U values I V curve parameters and radiance distribution modelling Discusses the new trends in thermal energy use including the architectural integration of collector systems integrated ventilation photovoltaics facades and solar powered absorption cooling systems Coverage of cutting edge applications such as active and passive cooling techniques and results from ongoing research projects

Solar Energy in Buildings Dorota Chwieduk, 2014-06-19 Solar Energy in Buildings presents solar radiation fundamentals and their applications in buildings supported by theoretical analysis and results of original simulation studies in solar energy availability collection and conversion for both active and passive use In depth coverage of energy balance and heat transfer in building envelopes is supported by the inclusion of calculations and case studies while contextualizing within an integrated design approach Explains the best uses of cutting edge advances such as concentrated solar thermal thermoelectric and polycrystalline materials Covers active and passive solar collection and conversion systems Provides energy balance calculations and case studies deriving from real installations connect theory and practice
