Solar Energy For Tomorrows World:

Tomorrow's World Duncan McLaren, Simon Bullock, Nusrat Yousuf, 2013-11-05 This title uses the concept of environmental space to resolve many of the issues facing us in the future and applies the lessons specifically to the UK. Believing that we occupy more environmental space than the world can afford, this book seeks to explain what we can do to live comfortably within what we actually have through efficiency and sufficiency. In addition, it aims to present the sustainable levels of consumption for Britain as targets for government, industry and households, as well as an idea of how to achieve them.

Energy Law and the Environment Rosemary Lyster, Adrian Bradbrook, 2006-08-31 Unsustainable practices worldwide in energy production and consumption have led to a plethora of environmental problems. Until recently, environmental law largely overlooked the relevance of energy production and consumption; energy was seen to be of little significance to the advancement of sustainable development. This has changed since 2000 with the global concern attached to climate change, the publication by the United Nations of the World Energy Assessment, and the detailed consideration given to this issue at the World Summit on Sustainable Development in Johannesburg in 2002. Australia has been seen to be lagging behind the other major industrialised nations of the world in addressing sustainable energy issues. This book was first published in 2006.

Shaping Tomorrow's World Elke Seefried, 2024-05-01 *Shaping Tomorrow's World* tells the crucial story of how futures studies developed in West Germany, Europe, the US, and within global futures networks from the 1940s to the 1980s. It charts the emergence of different approaches and thought styles within the field, ranging from Cold War defense intellectuals such as Herman Kahn to critical peace activists like Robert Jungk. Engaging with the challenges of the looming nuclear war, the changing phases of the Cold War, 1968, and the growing importance of both the Global South and environmentalism, this book argues that futures scholars actively contributed to these processes of change. This multiple award-winning study combines national and transnational perspectives to present a unique history of envisioning, forecasting, and shaping the future.
