Frey,2012-01-11 In her investigation of the social history of the common British soldier in the era of the American Revolution Sylvia Frey has extensively surveyed recruiting records contemporary training manuals statutes and memoirs in an attempt to provide insight into the soldier s life and mind In the process she has discovered more about the common soldier than anyone thought possible his social origins and occupational background his size age and general physical condition his personal economics and daily existence Her findings dispel the traditional assumption that the army was made up largely of criminals and social misfits Special attention is given to soldiering as an occupation Focusing on two of the major campaigns of the war the Northern Campaign which culminated at Saratoga and the Southern Campaign which ended at Yorktown Frey describes the human face of war with particular emphasis on the physical and psychic strains of campaigning in the eighteenth century Perhaps the most important part of the work is the analysis of the moral and material factors which induced men to accept the high risks of soldiering Frey rejects the traditional assumption that soldiers were motivated to fight exclusively by fear and force and argues instead that the primary motivation to battle was generated by regimental esprit which in the eighteenth century substituted for patriotism After analyzing the sources of esprit she

concludes that it was the sustaining force for morale in a long and discouraging war This book is a contribution to our understanding of the eighteenth century and should appeal not only to military historians but also to social and economic historians and to those interested in the history of medicine War Time Sten Rynning, Olivier Schmitt, Amelie Theussen, 2021-03-02 Perceptions of time contributed to recent Western military failings The decline of the West is once again a frequent topic of speculation Often cited as one element of the alleged decline is the succession of prolonged and unsuccessful wars most notably those waged in recent decades by the United States This book by three Danish military experts examines not only the validity of the speculation but also asks why the West particularly its military effectiveness might be perceived as in decline Temporality is the central concept linking a series of structural fractures that leave the West seemingly muscle bound overwhelmingly powerful in technology and military might but strategically fragile This temporality the authors say is composed of three interrelated dimensions trajectories perceptions and pace First Western societies to tend view time as a linear trajectory focusing mostly on recent and current events and leading to the framing of history as a story of rise and decline The authors examine whether the inevitable fall already has happened is underway or is still in the future Perceptions of time also vary across cultures and periods shaping socio political activities including warfare The enemy for example can be perceived as belong to another time being backward or barbarian And war can be seen either as cyclical or exceptional helping frame the public s willingness to accept its violent and tragic consequences The pace of war is another factor shaping policies and actions Western societies emphasize speed the shorter the war the better even if the long term result is unsuccessful Ironically one of the Western world s least successful wars also has been America s longest in Afghanistan This unique book is thus a critical assessment of the evolution and future of Western military power It contributes much needed insight into the potential for the West s political and institutional renewal Revised Statutes of the United States, Passed at the First Session of the Forty-third Congress, 1873-'74 United States, 1878 Catalogue of the Public Documents of the [the Fifty-third] Congress [to the 76th Congress] and of All Departments of the Government of the United States United States.
