The Late Jay Gould May Be Alive & Well Louis Peddicord, 2011      *Evolution in an Anthropological View* C. Loring Brace, 2000  
Brace has reworked ten of the many articles he has published on human evolution over the past 40 years and assembled them into a statement on evolutionary anthropology. He begins by investigating which anthropological data can benefit from an evolutionary perspective and which cannot. Then he explores such topics as Darwinism, race, cladistics, phylogeny, Neanderthals, dentition, and cultural ecology.

**Macroevolution, Contingency, and Divine Activity** Bradford McCall, 2023-10-27  
What are the things that God values in the creative process? How does one define God's activity in such a world? How is God's involvement different from a contingent what this author labels contingentist instance? Why do we need a God idea at all? Herein Bradford McCall addresses how divine, omnipotent love works with and within a contingentist, i.e., radically contingent evolutionary theory and worldview. Within the course of this project, he reaches a via media between the somewhat radical formalist position of Simon Conway Morris and the veritably radical contingent position of Stephen Jay Gould. But how is the contingentist, omnipotent and uncontrolling love of God understood as purposeful? McCall argues in detail that there, in fact, is some sort of purposiveness that is nevertheless working in a chastened Gouldian position, and he distinguishes between contingency and veritable divine involvement. He contends that God does not insist upon a particular outcome but merely allows propensities to work themselves out. God, omnipotently, loves the population of the natural world into greater forms of complexity, relationality, and beauty in varied and multifarious forms along with the extension of diversity.      *Mystery of Mysteries*  
Lucy T. Werkmeister, Professor of Philosophy and Director of the Program in the History and Philosophy of Science  
Michael Ruse, Michael Ruse, 2009-06-01  
With the recent Sokal hoax, the publication of a prominent physicist's pseudo-article in a leading journal of cultural studies, the status of science moved sharply from debate to dispute. Is science objective, a disinterested reflection of reality as Karl Popper and his followers believed? Or is it subjective, a social construction as Thomas Kuhn and his students maintained? Into the fray comes *Mystery of Mysteries*, an enlightening inquiry into the nature of science using evolutionary theory as a case study. Michael Ruse begins with such colorful luminaries as Erasmus Darwin, grandfather of Charles and Julian Huxley, brother of novelist Aldous and grandson of T. H. Huxley, Darwin's bulldog, and ends with the work of the English game theorist Geoffrey Parker, a microevolutionist who made his mark studying the mating strategies of dung flies, and the American paleontologist Jack Sepkoski, whose computer-generated models reconstruct mass extinctions and other macro events in life's history. Along the way, Ruse considers two great popularizers of evolution, Richard Dawkins and Stephen Jay Gould, as well as two leaders in the field of evolutionary studies, Richard Lewontin and Edward O. Wilson, paying close attention to these figures' cultural commitments. Gould's transplanted Germanic idealism, Dawkins's male-dominated Oxbridge circle, Lewontin's Jewish background, and Wilson's southern childhood. Ruse explicates the role of metaphor and

metavalue in evolutionary thought and draws significant conclusions about the cultural impregnation of science Identifying strengths and weaknesses on both sides of the science wars he demonstrates that a resolution of the objective and subjective debate is nonetheless possible *Jay Gould* Julius Grodinsky, 2015-09-30 This book is a volume in the Penn Press Anniversary Collection To mark its 125th anniversary in 2015 the University of Pennsylvania Press rereleased more than 100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print Spanning an entire century the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas *The Independent* Leonard Bacon, Joseph Parrish Thompson, Richard Salter Storrs, Joshua Leavitt, Henry Ward Beecher, Theodore Tilton, Henry Chandler Bowen, William Hayes Ward, Hamilton Holt, Fabian Franklin, Harold de Wolf Fuller, Christian Archibald Herter, 1898 **The Independent**, 1898 **The Secret Life of Corporations** Mark I. teaching big new ideas This book is the first comprehensive review of the conceptual change movement and of the impressive research it has spawned on how knowledge develops and can be taught in different content areas Because of its interdisciplinary focus chapter authors were instructed to write in a manner comprehensible to researchers and students from different fields The International Handbook of Research on Conceptual Change consists of twenty seven chapters that clarify the nature of conceptual change research describes its most important findings and demonstrates their importance for education It is organized into six sections that include detailed discussions of key theoretical and methodological issues the roots of conceptual change research in the philosophy and history of science mechanisms of conceptual change and learner characteristics It also contains chapters that describe conceptual change research in the content areas such as physics astronomy biology medicine and health and history A particular focus is given to students difficulties in learning more advanced and counter intuitive concepts     The Spectator ,1873 A weekly review of politics literature theology and art
