**The Law of International Cartels** Heinrich Kronstein, 1973 Treatise and commentary on monopoly structure and international market regulation in context with national economic legislation and international law examines trade policy issues with regard to trade regulation and includes contracting and licensing trade mark protection foreign investment restrictions jurisdiction over foreign enterprise arbitration the role of USA etc References **The Law of International Cartels** Heinrich Kronstein (juriste).), 1973 [A History of Business Cartels](#) Martin Shanahan, Susanna Fellman, 2022-07-05 International cartels are powerful organizations that impact our everyday lives although they are little known This book presents 15 historical case studies of international cartels that include agricultural and mineral commodities the machinery industry telephone equipment whiskey and cement These cases reveal that international cartels manipulated prices and shared markets over many decades but that their real impact was far wider The global convergence towards criminalizing serious cartel conduct has seen a revival in historical research on cartels and competition policy The regulation of anti competitive behaviour has changed over time To understand why the US European and other modern economies altered their policies through the 20th century it is critical to understand when how and why governments have interacted with and been influenced by business organizations such as cartels This volume draws together researchers from different nations to examine the impact of international cartels on the experience of individual nations those nations interactions with one or more international cartels and ultimately the interactions of individual nations with the wider international community This book will be of interest to researchers academics and advanced students in the fields of business and economic history political economy and government policy as well as those interested in cartels and their impact on the wider economy *International Cartel Enforcement* Simon J. Evenett, Margaret Levenstein, Valerie Yvonne Suslow, 2001 Enforcement against international cartels surged in the late 1990s Despite this enforcement activity there are good reasons to doubt that national laws sufficiently deter cartel formation **The International Cartel Movement** Louis Domeratzky, 1928 *Strategies to Achieve a Binding International Agreement on Regulating Cartels* John Sanghyun Lee, 2016-11-24 This book addresses the lack of binding multi lateral international agreement on cartels through analysis of trials and failures It also suggests strategic approaches to overcome current standstills In addition the book contrasts international agreement on cartels with inter governmental commodity agreement which has been developed separately through international law Through this project the author puts forth that successful international law on cartels needs to reflect the interests and arguments of developing countries [The International Aluminium Cartel](#) Marco Bertilorenzi, 2015-09-16 Aluminium was one of most cartelised industries in the international economic panorama of the 20th century Born following the discovery of electrolytic smelting process in 1886 this industry even in its infancy established a cartel which characterised its history until nearly 1980 Managers of the aluminium industry from various historical eras and countries shared the same vision about the

development of their industry to keep prices as stable as possible in order to encourage expansions and to provide return on investments Price instability which characterised the trade of other commodities was unknown to the aluminium industry This book neither argues that cartels are fundamentally evil nor attempts to demonstrate that cartels are optimal business organisations It instead provides an in depth and frank analysis of the internal working of industrial organisations and of the interplay between cartels and political powers and institutions The International Aluminium Cartel offers explanations for the construction and collapse of cartels descriptions of their operations and an historical interpretation of their experiences Incorporating information gleaned from a unique collection of private and public archives from several countries this unique study will appeal to a wide variety of readers including academics interested in industrial and business history
