The UN Convention on the Law of the Non-Navigational Uses of International Watercourses Laurence Boisson de Chazournes, Makane Moïse Mbengue, Mara Tignino, Komlan Sangbana, Jason Rudall, 2018-12-13 The United Nations Convention on the Law of the Non Navigational Uses of International Watercourses plays a crucial role in protecting and managing international watercourses and other sources of fresh water Boisson de Chazournes Mbengue Tignino and Sangbana head a team of experts in this Commentary examining the travaux préparatoires leading to the Convention and the practice that has developed since the adoption of the Convention in 1997 Tackling the rationale and objectives of the provisions they offer crucial insights to the Convention's impact on the development of a universal regime for shared water resources Examining cross cutting topics such as the core water principles the prevention and settlement of water disputes the relationship between the Convention and other legal instruments as well as the role of the ICJ and other judicial means to solve water disputes this book is crucial to all those who seek a deep understanding of water law **The Law of**

Non-Navigational Uses of International Watercourses J. Bruhács, 2023-11-27 The presentation of the historical development and the scientific elaboration of the international law regulating non navigational uses of international watercourses exemplifies the richness of this branch of international law The role of general international law in this field of international relations the acceptance thereof by the international community its legal nature functions contents and codification are all examined Finally an outline of the institutions of international cooperation is given The Law of Non-navigational Uses of International Watercourses Nahid Islam, 2010-01-01 Presentation de l'auteur Despite Asia's large share of global water resources and the importance of its water for sustaining one of the largest agrarian populations in the world Asia's trans boundary water resource management regimes are poorly developed There are only two working international regimes in South and South east Asia the Mekong and the Indus regimes The remaining international watercourses in Asia are used by riparian countries in a self interested manner without much consideration for the interests of other states or for the environment These national interests do not often represent the interests and needs of the local people This book is divided into three Parts Part I discusses the different contexts of law making in the industrialized west and in agrarian societies in Asia as well as the changing context of law making following the emergence of the concept of sustainable development Part II discusses the regime of international watercourses Part III of the book presents two case studies in Asia the Mekong and the Ganges The main argument is that in the absence of public participation in decision making and resource management the basin states revert to using the watercourses according to the principles of the classical regime The result so far has been unsustainable development environmental degradation and growing poverty of local user communities *The Law of Non-navigational Uses of International Watercourses* János Bruhács, 1993

Equitable Utilization Ibrahim Kaya, 2003 International watercourse law differs from the national laws of most countries

It was of little consequence until the Industrial Revolution but as resources have become scarcer it has taken on a much greater political and economic significance Ibrahim Kaya's study addresses the key issues *The Law of International Watercourses* Stephen C. McCaffrey, 2003 The Law of International Watercourses examines the rules of international law governing the non navigational uses of international watercourses The continued growth of the world's population places increasing demands on Earth's finite supply of fresh water Because two or more states share many of the world's most important drainage basins including The Danube The Ganges The Indus The Jordan The Mekong The Nile The Rhine and The Tigris Euphrates competition for increasingly scarce fresh water resources is likely to increase Resulting disputes will be resolved against the backdrop of the rules of international law governing the use of international watercourses In addition these rules are of importance to donor institutions and governments that provide development assistance for projects relating to shared fresh water resources While the law of international watercourses continues to evolve due to the intensification of use of shared fresh water resources and consequently increasingly frequent contacts between riparian states the basic rules are reflected in the 1997 UN Convention on the law of the non navigational uses of international watercourses This book devotes a chapter to the 1997 Convention but also examines the factual and legal context in which the Convention should be understood considers the more important rules of the Convention in some depth and discusses specific issues that could not be addressed in a framework instrument of that kind In particular the book studies the major cases and controversies concerning international watercourses as a background against which to consider the basic substantive and procedural rights and obligations of states

International Watercourses Law for the 21st Century Surya P. Subedi, 2016-12-05 This edited volume presents a comprehensive and comparative view of the law of international watercourses with special reference to the issues facing the Ganges River basin It provides an analysis of the development of

international waterways law and outlines the essentials of the UN Convention on non navigational uses of international watercourses Focusing on relations between the three riparian states of the River Ganges and the potential for cooperation the volume also examines the domestic legal regimes of the area and the political dimension to the issues of sharing the waters of the river The work presents a comparative picture with an analysis of developments in the Rhine and Mekong basins comparing developments in the legal regimes of these areas with the experience of South Asia Presenting an up to date analysis of the current law and pointing the direction for future developments this collection will be a valuable resource for academics researchers and policy makers working in this area *Convention on the Law of the Non-Navigational Uses of International Watercourses* ,2021 **Training Manual on International Environmental Law** ,2006 It is widely recognized that most environmental problems challenges and solutions are transboundary regional or global in scope The environment is an area where states and stakeholders are cooperating extensively and progressively This manual seeks to provide a comprehensive overview of the current body of environmental law Publisher s description **Documents in International Environmental Law** Philippe Sands,Paolo Galizzi,2004-05-20 The companion volume to the second edition of Philippe Sands Principles of International Environmental Law **Recueil Des Cours, Collected Courses 2001** Académie de Droit International de la Ha Staff,2002-06-30 The Academy is an institution for the study and teaching of Public and Private International Law and related subjects Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law The contents of this volume consist of International Protection of the Environment by M A FITZMAURICE Professor at Queen Mary University of London To access the abstract texts for this volume please click here **The Law of the Non-Navigational Uses of International Watercourses** United Nations. International Law Commission,1976 [The Principle of Integration in International Watercourse Cooperation Regimes](#) Pol Pallàs Secall,2025-06-19 The principle of integration is the backbone of sustainable development yet its practical application remains elusive How can States integrate the economic social and environmental dimensions in the governance of common goods This book seeks to address this question by examining a particularly sensitive domain of cooperation the international watercourses From the Mekong to the Senegal River and from the Great Lakes to the Danube it analyses the legal and institutional instruments of nine international watercourse cooperation regimes to determine how the principle of integration is put into practice This book finds that there are several instruments underutilised or entirely unused offering potential opportunities for improvement **Management of Shared Groundwater Resources** Eran Feitelson,Marwan Haddad,2012-12-06 Most of the world s freshwater resources in the liquid state i e not in glaciers and polar caps are underground As the population grows and demand for water rises reliance on

groundwater increases In many cases the groundwater underlies boundaries or is part of a hydraulic system that crosses boundaries In such cases there is always the danger that the prisoner s dilemma will run its course and all parties will compete over who will pump the most water ultimately destroying the storage potential to the detriment of future generations of all parties reliant on the groundwater This book explores the options and means for averting this all too realistic scenario by managing these shared groundwater resources Nowhere is the likelihood of excessive use of groundwater greater than in the water scarce Middle East and especially in the Israeli Palestinian case Here both sides are heavily reliant on a shared aquifer the Mountain aquifer This book is the outcome of a seven year effort to find ways to manage the Mountain aquifer perhaps the most important resource shared by Israelis and Palestinians As part of this cooperative study four workshops were held in which a selected number of Palestinian Israeli and foreign experts were invited The chapters in this book were originally presented in one of these workshops To these papers introductory and concluding chapters were added

Fresh Water in International Law Laurence Boisson de Chazournes, 2021-04-22 This book addresses the diverse ways in which international law governs the uses management and protection of fresh water The regulation of fresh water has primarily developed through the conclusion of treaties concerning international watercourses yet a number of other legal regimes also apply to the governance of fresh water In particular there has been an increasing recognition of the importance of fresh water to environmental protection The development of international human rights law and international humanitarian law has also proven crucial for ensuring the sound and equitable management of this resource In addition the economic uses of fresh water feature prominently in the law applicable to watercourses while water itself has become an important element of the trade and investment regimes These bodies of rules and principles not only surface in an array of dispute settlement mechanisms but also stimulate wider trends of institutionalization Since the publication of the first edition of this volume in 2013 water has continued to be at the forefront of the international agenda and the adoption of the UN Sustainable Development Goals constitutes a milestone around which various public and private initiatives have been launched This book presents and appraises these important developments as part of its comprehensive analysis of the origin and scope of the various areas of international law as they apply to fresh water It demonstrates how these areas connect and adapt to one another forming an integrated body of international principles

A 'Stepped Approach' to Disputes on International Watercourses Riley T. Denoon, 2025-07-10 With increasing global pressure on scarce international water resources the importance of dispute avoidance and resolution at the international level cannot be understated A Stepped Approach to Disputes on International Watercourses explores a conceptual and practical framework for addressing these complex challenges presenting a structured multi faceted approach that integrates technical expertise diplomatic negotiations and when necessary binding adjudication Drawing on a broad analysis of 225 international watercourse agreements it puts forward a stepped approach as an important tool that can foster cooperation prevent

conflicts and ensure the equitable and sustainable use of our shared water resources *Governance of Offshore Freshwater Resources* Renée Martin-Nagle, 2020-01-20 In *Governance of Offshore Freshwater Resources* Ren e Martin Nagle presents the scientific proof for vast quantities of freshwater in the seabeds explains the socio economic factors that will lead to development of the resource and examines the international law principles and regimes that would guide policymakers in designing a governance system for offshore freshwater Pursuant to the law of the sea coastal states have sovereign rights to seabed resources within their exclusive economic zones Offshore hydrocarbon development has produced customary practices for cooperation that were inspired by international water law and that could serve as a template for governing transboundary offshore freshwater Given the vital nature of freshwater equitable distribution of this new resource and its benefits should be considered Third Report on the Law of the Non-navigational Uses of International Watercourses Stephen Myron Schwebel, 1981
