## **Servitization and Physical Asset Management**

Michael John Provost, 2018-12-31 Servitization and Physical Asset Management third edition was developed to provide a structured source of guidance and reference information on the business opportunities linked to servitization and the management of physical assets. A growing trend in the global economy servitization focuses on the actual deliverables of an asset from the perspective of the customer electricity instead of the power plant thrust instead of the engine mobility instead of a plane or a car. The book offers high level overviews of how to servitized and manage assets from a variety of perspectives reviewing nearly 1 500 books magazine articles papers and presentations and websites. Written by Michael J. Provost Ph D and a subject matter expert in modeling simulation analysis and condition monitoring. Servitization and Physical Asset Management third edition is an invaluable reference to those considering providing asset management services for the products they design and manufacture. It is also meant to support middle management wishing to know what needs to be done to look after the assets they are responsible for and who to approach for help and academics doing research in this field.

Michael Provost is a British engineer with a doctoral degree in thermal power from Cranfield University

**Instrumentation and Control Handbook** Swapan Basu, Ajay Kumar Debnath, 2019-06-09 Power Plant Instrumentation and Control Handbook Second Edition provides a contemporary resource on the practical monitoring of power plant operation with a focus on efficiency reliability accuracy cost and safety. It includes comprehensive listings of operating values and ranges of parameters for temperature pressure flow and levels of both conventional thermal power plant and combined cogen plants supercritical plants and once through boilers. It is updated to include tables charts and figures from advanced plants in operation or pilot stage. Practicing engineers freshers advanced students and researchers will benefit from discussions on advanced instrumentation with specific reference to thermal power generation and operations. New topics in this updated edition include plant safety lifecycles and safety integrity levels advanced ultra supercritical plants with advanced firing systems and associated auxiliaries integrated gasification combined cycle IGCC and integrated gasification fuel cells IGFC advanced control systems and safety lifecycle and safety integrated systems. Covers systems in use in a wide range of power plants conventional thermal power plants combined cogen plants supercritical plants and once through boilers. Presents practical design aspects and current trends in instrumentation. Discusses why and how to change control strategies when systems are updated changed. Provides instrumentation selection techniques based on operating parameters. Spec sheets are included for each type of instrument. Consistent with current professional practice in North America Europe and India. All new coverage of Plant safety lifecycles and Safety Integrity Levels. Discusses control and instrumentation.
