The Invention of the Future Bruno Carvalho, 2026-01-13 A kaleidoscopic and original new history of urbanization from Lisbon to New York Paris to Rio de Janeiro and Buenos Aires to Lagos For the past three centuries urban dwellers and planners have imagined future cities that would be radically different from those of the past Planners pursued progress whether focused on flying vehicles above sewage systems below or daily life in between Yet as Bruno Carvalho shows in this original and wide ranging history which

features some sixty illustrations modern cities continuously defied predictions Visionary designs and technological innovations created dramatic unforeseen outcomes and the ongoing urban boom is a story of continuity as well as rupture A compelling history of imagined futures and the transformation of urban life The Invention of the Future also suggests what we might learn from the stories of our cities as we shape them for the twenty first century Moving between large scale changes and detailed examples this captivating narrative tells the story of key moments and turning points the rebuilding of Lisbon after the 1755 earthquake the 1811 Commissioners Plan for Manhattan Parisian reforms from 1853 to 1870 Le Corbusier s plans for South American cities in the 1920s and 1930s the postwar victory of the car the utopian capital of Brasilia and urban growth in Africa In recent decades Carvalho argues the capacity to invent urban futures has become increasingly constrained Social and environmental challenges loom large But the story is not over While cities helped create current problems compact and transit rich urbanization might be our best hope to combine high living standards with sustainability Sometimes moving forward can involve reaching back to the future

Gary, the Most American of

All American Cities S. Paul O'Hara, 2011-01-06 U S Steel created Gary Indiana The new steel plant and town built on the site in 1906 were at once a triumph of industrial capitalism and a bold experiment in urban planning Gary became the canvas onto which the American public projected its hopes and fears about modern industrial society In its prime Gary was known as the magic city steel s greatest achievement and an industrial utopia later it would be called the very model of urban decay S Paul O Hara traces this stark reversal of fortune and reveals America s changing expectations He delivers a riveting account of the boom or bust mentality of American industrialism from the turn of the 20th century to the present day Bibles and Baedekers Michael Grimshaw, 2014-12-05 Contemporary tourism and travel have become a form of religion a new opiate of the masses However could Church and theology be religious forms of tourism and travel Bibles and Baedekers offers a theology of tourism and exile for a modern and postmodern world It examines the ways in which location identity and movement have made use of religious texts and metaphor and questions the relative absence of secular texts and ideas in theology The theology of the tourist and traveller is one of new experiences the acquisition of identity through movement Bibles and Baedekers uniquely applies this to the postmodern Christian embodying the fulfilment of Bonhoeffer s religionless Christianity dislocated from both a secular and religious world **Critical Regionalism** Douglas Reichert Powell, 2012-09-01 The idea of region in America has often served to isolate places from each other observes Douglas Reichert Powell Whether in the nostalgic celebration of folk cultures or the urbane distaste for hicks certain regions of the country are identified as static insular and culturally disconnected from everywhere else In Critical Regionalism Reichert Powell explores this trend and offers alternatives to it Reichert Powell proposes using more nuanced strategies that identify distinctive aspects of particular geographically marginal communities without turning them into peculiar hick towns He enacts a new methodology of critical regionalism in order to link local concerns and debates to larger patterns of history politics and culture To illustrate his method in each chapter of the book Reichert Powell juxtaposes widely known texts from American literature and film with texts from and about his own Appalachian hometown of Johnson City Tennessee He carries the idea further in a call for a critical regionalist pedagogy that uses the classroom as a place for academic writers to build new connections with their surroundings and to teach others to do so as well
