The Life and Work of John Nash, Architect Sir John Newenham Summerson, 1980      *The Life and Work of John Nash, Architect* Sir John Newenham Summerson, 1980      *Sir John Soane? Influence on Architecture from 1791* Oliver Bradbury, 2017-07-05 Sir John Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753-1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture      Laughing at Architecture Michela Rosso, 2018-11-29 In a media saturated world humour stands out as a form of social communication that is especially effective in re appropriating and questioning architectural and urban culture Whether illuminating the ambivalences of metropolitan life or exposing the shock of modernisation cartoons caricature and parody have long been potent agents of architectural criticism protest and opposition In a novel contribution to the field of architectural history this book outlines a survey of visual and textual humour as applied to architecture its artefacts and leading professionals Employing a wide variety of visual and literary sources prints the illustrated press advertisements theatrical representations cinema and TV thirteen essays explore an array of historical subjects concerning the critical reception of projects buildings and cities through the means of caricature and parody Subjects range from 1750 to the present and from Europe and the USA to contemporary China From William Hogarth and George Cruikshank to Osbert Lancaster Adolf Loos satire and Saul Steinberg's celebrated cartoons of New York City graphic and descriptive humour is shown to be an enormously fruitful yet largely unexplored terrain of investigation for the architectural and urban historian      Stories from Architecture Philippa Lewis, 2021-10-19 The imagined histories of twenty five architectural drawings and models told through reminiscences stories conversations letters and monologues Even when an architectural drawing does not show any human figures we can imagine many different characters just off the page architects artists onlookers clients builders developers philanthropists working observing admiring arguing In *Stories from Architecture* Philippa Lewis captures some of these personalities through reminiscences anecdotes conversations letters and

monologues that collectively offer the imagined histories of twenty five architectural drawings Some of these untold stories are factual like Frank Lloyd Wright s correspondence with a Wisconsin librarian regarding her 5 000 dream home or letters written by the English architect John Nash to his irascible aristocratic client Others recount a fictional if credible scenario by placing these drawings and with them their characters into their immediate social context For instance the dilemmas facing a Regency couple who are considering a move to a suburban villa a request from the office of Richard Neutra for an assistant to measure Josef von Sternberg s Rolls Royce so that the director s beloved vehicle might fit into the garage being designed by his architect a teenager dreaming of a life away from parental supervision by gazing at a gadget filled bachelor pad in Playboy magazine even a policeman recording the ground plans of the house of a murder scene The drawings reproduced in color are all sourced from the Drawing Matter collection in Somerset UK and are fascinating objects in themselves but Lewis shifts our attention beyond the image to other possible histories that linger invisible beyond the page and in the process animates not just a series of archival documents but the writing of architectural history

**The Architecture of William Nichols** Paul Hardin Kapp,2015-02-05 The Architecture of William Nichols Building the Antebellum South in North Carolina Alabama and Mississippi is the first comprehensive biography and monograph of a significant yet overlooked architect in the American South William Nichols designed three major university campuses the University of North Carolina the University of Alabama and the University of Mississippi He also designed the first state capitols of North Carolina Alabama and Mississippi Nichols s architecture profoundly influenced the built landscape of the South but due to fire neglect and demolition much of his work was lost and history has nearly forgotten his tremendous legacy In his research onsite and through archives in North Carolina Alabama Louisiana and Mississippi Paul Hardin Kapp has produced a narrative of the life and times of William Nichols that weaves together the elegant work of this architect with the aspirations and challenges of the Antebellum South It is richly illustrated with over two hundred archival photographs and drawings from the Historic American Building Survey

Augustine The essays in this volume illustrate the elaboration of that vision both in the planning and depiction of actual cities and in the speculation on social justice to which Voltaire in particular devoted himself **Re-Presenting the Metropolis**

Dana Arnold,2017-07-05 The evolution of an urban self consciousness in London in the early nineteenth century played a fundamental role in the shaping of the city In this volume Dana Arnold explores the responses to the city among the urban bourgeoisie and their influence on the experience and development of London Each of the chapters re presents the metropolis through a thematic consideration of the urban infrastructure and architecture including public open spaces new roads and bridges public monuments and buildings for show including museums galleries and townhouses These discrete walks around London cohere into a kaleidoscopic view of the metropolis as a continually evolving entity The nature and perception of urban experience and social life are mapped against this changing image of London revealing at once the modernity of the metropolis and the importance of the past especially antiquity to the construction of this transient present Evidence of attitudes towards the metropolis is drawn from a range of contemporary visual and written sources including commentaries guidebooks literature and parliamentary reports and enquiries The study of sensory responses to the city allows the exploration of the dynamic between city and society and a broader cultural understanding of urban form London is re presented as a matrix of key architectural social and cultural themes and as the emblematic expression of different kinds of identities relating to gender class and nationhood *Thomas 'Jupiter' Harris* Warren Oakley,2018-08-31 This is the first

Encyclopedia of Interior Design provides a history of interior decoration and design from ancient times to the present day. It includes more than 500 illustrated entries covering a variety of subjects ranging from the work of the foremost designers to the origins and function of principal rooms and furnishing types as well as surveys of interior design by period and nationality all prepared by an international team of experts in the field. Entries on individuals include a biography, a chronological list of principal works or career summary, a primary and secondary bibliography, and a signed critical essay of 800 to 1500 words on the individual's work in interior design. The style and topic entries contain an identifying headnote, a guide to main collections, a list of secondary sources, and a signed critical essay.

*The Cambridge Social History of Britain, 1750-1950* F. M. L. Thompson, 1990. Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society, historians have had no difficulty in finding their subject. The difficulty rather is that the advance has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp the overall picture. In these three volumes, as is the tradition in Cambridge Histories, a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750 from three complementary perspectives: those of regional communities, of the working and living environment, and of social institutions. Each volume is self-contained and each contribution thematically defined; each contains its own chronology of the period under review. Taken as a whole, they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change.

The Oxford Dictionary of Architecture James Stevens Curl, Susan Wilson, 2015. With over 6 000 entries, this is the most authoritative dictionary of architectural history available.

Humphry Repton Tom Williamson, 2020-09-17. Humphry Repton 1752-1818 remains one of England's most interesting and prolific garden and landscape designers. Renowned for his innovative design proposals and distinctive before and after images captured in his famous Red Books, Repton's astonishing career represents the link between the simple parklands of his predecessor Capability Brown and the more elaborate, structured, and formal landscapes of the Victorian age. This lavishly illustrated book, based on a wealth of new research, reinterprets Repton's life, working methods, and designs, and examines why they proved so popular in a rapidly changing world.

**London's Teeming Streets, 1830-1914** James Winter, 2013-06-17. The streets of Victorian London became increasingly congested with vehicles, fast and furious drivers, pedestrians, costermongers, prostitutes, brass bands, homeless children, and other obstacles to safe and rapid motion. Concerned citizens were alarmed by this unprecedented build-up of traffic and pollution. But how did this chaotic state come about, and why was more not done to prevent it? *London's Teeming Streets* brings an historical perspective to present-day concerns about the effects of continued urban expansion and shows that many current problems date back to the Victorian era. James Winter reveals that the issue of street reform was fraught with political intrigue. Many reformers were liberals, yet the question of attempting to limit or prohibit activity on the King's Highway, which was by definition an open and

democratic preserve brought the very purpose of liberal reform into sharp focus      *City of Laughter* Vic Gatrell, 2007-01-01  
Drawing upon the satirical prints of the eighteenth century the author explores what made Londoners laugh and offers  
insight into the origins of modern attitudes toward sex celebrity and ridicule
