The Limits Of Liberalization Regulatory Cooperation And The New Transatlantic Agenda:

The Limits of Liberalization Maria Green Cowles, 1997 Policymaking and Prosperity Stuart S. Nagel, 2003-01-01

Policymaking and Prosperity is the second volume of a three volume set that examines the multidimensional role of policy in the development and promotion of democracy prosperity and peace The prosperity volume discusses the relationship between democratic practices and economic prosperity Its chapters consider questions of bi and multilateral trade policy relations the impact of economic pluralism sustainable development the global agricultural economy international environmental politics and bioregionalism **Transatlantic Governance in the Global Economy** Mark A. Pollack, Gregory C. Shaffer, 2002-05-30 Governance in the global economy is a topic of enormous importance Despite the triumph of free trade many actors still try to protect important sectors of society from the potentially destructive effects of unfettered free markets and rules remain indispensable in settling disputes among states over trade investments and copyrights This book is particularly significant because of its conceptual clarity and broad scope Focusing on the transatlantic area as the engine of the world economy the editors assess three different conceptual models offered by scholars the classic state centered approach the transgovernmental approach and the transnational system of private actors in an emerging global society After a series of excellent case studies on trade and competition policies food safety business and labor dialogues and civil society initiatives the editors conclude that the U S executive and the European Commission have been and remain the dominant actors in transatlantic governance Among all these networks business remains the most successful At a time when many essay collections are loosely shaped unoriginal or jargon ridden this one is a model of research and analysis Foreign Affairs

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer, 2000-04-30

Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United States needs allies Though its influence in the world trade arena will continue America s hegemony has ended The European Union is America s most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States

proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations *The Political Importance of Regional Trading Blocs* Bart Kerremans,Bob Switky,2018-02-06 This title was first published in 2000 This text addresses concerns about regional trade agreements From a variety of political and economic angles it explains the emergence of trade blocs their internal policies and politics and their effects on global trade It does not provide sequential descriptions and analyses of each of the world s major trading blocs The focus here is on a number of causal factors that help explain the emergence of trading blocs and the development of their relations to and effects on the multilateral trading system In each chapter attempts have been made to draw theoretical and case based generalizations that may apply to other trade blocs than the used in the empirical analyses *The Limits of Liberalization* American Institute for Contemporary German Studies,1997-05-01 *Trade Politics* Brian Hocking,Steven McGuire,2013-03-04 Leading experts provide a clear overview of the evolving environment of trade politics and the current issues surrounding its development *The New Transatlantic Agenda at Five ,2002* *Barriers or Benefits?* David Vogel,2010-12-01 Government health safety and environmental standards have in the past two decades often created barriers to international trade These non tariff barriers have become the focus of trade disputes negotiations and agreements This book explains the dynamics of conflict and cooperation over consumer and environmental regulation between the European Union and the United States It explores the most celebrated cases of transatlantic conflicts over regulatory standards the EU s beef hormone and legtrap bans and America s fuel economy regulations as well as the successes of the two partners in coordinating rules for chemical and drug testing animal inspection and the reduction of ozone depleting chemicals David Vogel argues that transatlantic regulatory conflict has less to do with protectionism and more to do with deeply rooted differences in cultural values and political priorities in Europe and the United States These differences he explains constitute a fundamental and ongoing source of trade conflict between the EU and the U S The pattern of EU U S regulatory relations has important implications not only for the United States and Western Europe but for the entire global economy Whatever regulatory standards both adopt become de facto global standards According to Vogel the most important challenge for the U S and the EU is to promote and strengthen international regulatory cooperation Each needs to pay more attention to their common interests in promoting international trade and improving global standards than to their often heated differences over particular consumer and environmental policies **EU Economic Governance and Globalization** Miriam Campanella,Sylvester C. W. Eijffinger,2003 It is through a gradual evolution rather than by grand design that the somewhat fragmented economic policies of the EU now appear to be heading towards a rather more robust and coherent economic governance EU Economic

Governance and Globalization considers the following crucial question as the EU enters its final stage of institution building will the economic institutions of the EU push ahead to reform its rigid national economies and open them up to globalization and international competition Focusing on telecommunications air transportation currency competition taxation eastern enlargement and transatlantic relations the contributors to this book question whether EU standards regulatory regimes and policies are flexible enough to bring about a dynamic and open economy This book will be of interest to scholars of European and regional studies and international political economy as well as policy analysts and policymakers

Telecommunications Reform in Germany , 1998

From Here to Free Trade Ernest H. Preeg, 1998-05-13 In his new book Ernest Preeg analyzes international trade and investment in the 1990s and lays out a comprehensive U S trade strategy for the uncertain period ahead He examines the influence of the World Trade Organization WTO and argues that economic globalization is beneficial to the U S economy in the short to medium term while raising important questions about national sovereignty and security over the longer term Preeg believes regional free trade agreements will soon encompass the majority of world trade but they can conflict with the WTO s multilateral objectives The central challenge for U S trade strategy then is to integrate the now largely separate multilateral and regional tracks of the world trading system The first essay assesses U S interests in economic globalization the second examines recent steps toward free trade at the multilateral and regional levels and the next three offer an in depth critique of U S regional free trade objectives in the Americas across the Pacific and possibly with Europe The final essay presents a multilateral regional synthesis for going from here to free trade over the coming decade

The European Union and the WTO Doha Round Gabriele Tondl, 2007 The WTO Doha Round has initiated one of the most difficult agendas in trade deregulation The opening of substantial agricultural markets and the liberalization of the service sector have shown to be some of the most controversial and sensitive fields in multilateral trade liberalization The gaps between the different positions of the world trading partners are particularly pronounced This volume focuses on the agenda of the Doha Round from the perspective of the European Union Experts from academia the European

Commission the World Trade Organization and the World Bank give an account of the agenda of the Doha Round and discuss the contentious interests of the EU and its trading partners It is argued that the EU has a strong interest in the negotiations of the Doha Round but faces potentially high adjustment requirements On the one hand enterprises in the EU press to gain market access to partner countries in a number of still protected manufacturing products and wish to acc **Die künftige Gestalt Europas, Funktionalismus oder Föderalismus?** Ireneusz Paweł Karolewski, 2000
