Hooked on Growth Douglas E. Booth, 2004-05-03 Challenging conventional wisdom on the virtues of a consumer economy this provocative book explores the nexus between growth and environment sustainability The miracle of the modern affluent economy is an ever swelling cornucopia of consumer goods leading to expanding consumption as the essential underpinning of economic growth in more and more parts of the globe Douglas Booth contends that expansion in this form amounts to an addiction Are we as a society hooked on economic growth of a kind that carries with it significant

threats to the natural environment A critical dilemma for the modern economy is that growth is required to prevent the pain of unemployment As growth continues the environment declines but if growth slows unemployment rises We seem trapped in a spiraling predicament like that of the addict This accessible work explores whether getting unhooked from growth to meet the needs of the environment is possible Giving the environment priority over growth may seem to some like a radical idea yet the author argues that it can be accomplished using marketable emissions allowances transferable development rights and other tools popular with conventional economists It can also be achieved by creating more interesting and environmentally friendly urban landscapes less beholden to the automobile The key problem a less growth oriented society will face is ensuring that everyone who wants employment can find it This will require something that many people wish for anyway a shorter workweek More leisure a higher quality environment and more attractive cities and towns are the potential rewards of a less consumption oriented society Yet powerful economic interests that benefit from a high growth economy are arrayed against changes in the status quo Under what circumstances can the power of special interests be overcome in the name of environmental conservation This is the author's critical final question as he offers a clear path to a sustainable economic and environmental future

Gender in the Legal Profession Joan Brockman, 2001 An analysis of the causes and implications of the gendered structure of the legal profession in Canada and elsewhere The author concludes that until there is significant change in how women are perceived in relation to domestic duties it is unlikely that they will attain equality within the legal profession

Men, Wage Work and Family Paula McDonald, Emma Jeanes, 2012 In the last two decades there has been a plethora of research on a range of subjects collectively and rhetorically known as work life balance The bulk of this research which spans disciplines including feminist sociology industrial relations and management has

focused on the significant concerns of employed women and or dual career couples Less attention has been devoted to scholarship which explicitly examines men and masculinities in this context Meanwhile public and organizational discourse is largely espoused in gender neutral terms often neglecting salient gendered issues which differentially impact the ability of women and men to successfully integrate their work and non work lives This edited book brings together empirical studies of the work life nexus with a specific focus on men s working time arrangements how men navigate and traverse paid work and family commitments and the impact of public and organizational policies on men s participation in work leisure and other life domains The book is innovative in that it presents both macro institutional how policy affects practice and micro individual from men s own perspectives level studies allowing for a rich and contrasting exploration of how men s participation in paid work and other domains is divided conflicted or integrated The essays in this volume address issues of fundamental social labor market and economic change which have occurred over the last 20 years and which have profoundly affected the way work care leisure and community have evolved in different contexts Taking an international focus Men Wage Work and Family contrasts various public and organizational policies and how these policies impact men s opportunities and participation in paid work and non work domains in industrialised countries in Europe North America and Australia
