The Peasants Of Marlhes:

The Peasants of Marlhes James R. Lehning, 1980 Lehning finds that economic development in Marlhes did not destroy its peasantry Rather the peasants adjusted to the commercial forces of the industrial world by adapting traditional forms of behavior and attitudes toward the new conditions not abandoning old ways and adopting unfamiliar ones In fact the peasant family was a remarkably flexible unit adapting patterns of family behavior to the impact of industry market agriculture and heavy rural urban migration Originally published in 1980 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value The Peasants of Marlhes James R. James R. Lehning, 1980 Peasants and Protest Laura Levine Frader, 2023-04-28 In the first decade of the twentieth century the sleepy vineyard towns of the Aude department of southern France exploded with strikes and protests Agricultural workers joined labor unions the Socialist party established a base among peasant vinegrowers and the largest peasant uprising of twentieth century France the great vinegrowers revolt of 1907 shook the entire south with massive demonstrations In this study Laura Levine Frader explains how left wing politics and labor radicalism in the Aude emerged from the economic and social transformation of rural society between 1850 and 1914 She describes the formation of an agricultural wage earning class and discusses how socialism and a revolutionary syndicalist labor movement together forged working class identity Frader s focus on the making of the rural proletariat takes the study of class formation out of the towns and cities and into the countryside Frader emphasizes the complexity of social structure and political life in the Aude describing the interaction of productive relations the gender division of labor community solidarities and class alliances Her analysis raises questions about the applicability of an urban industrial model of class formation to rural society This study will be of interest to French social historians agricultural historians and those interested in the relationship between capitalism class formation and labor militancy In the first decade of the twentieth century the sleepy vineyard towns of the Aude department of southern France exploded with strikes and protests Agricultural workers joined labor unions the Socialist party established a base among peasant vinegrower **Voices of the People in Nineteenth-Century France**

Abigail Harrison Moore, R.W. Sandwell, 2021-07-15 In the early 1970s a German study estimated that women expended as many calories cleaning their coal mining husbands work clothes as their husbands did working below ground arguably making the home as much a site of industrialized work as factories and mines But while energy studies are beginning to

acknowledge the importance of social and historical contexts and to produce more inclusive histories of the unprecedented energy transitions that powered industrialization women have remained notably absent from these accounts In a New Light explores the vital place of women in the shift to fossil fuels that spurred the Industrial Revolution illuminating the variety of ways in which gender and energy intersected in women s lives in nineteenth and twentieth century Europe and North America From their labour in the home where they managed the adoption of new energy sources to their work as educators in electrical housecraft and their protests against the effects of industrialization women took on active roles to influence energy decisions Together these essays deepen our understanding of the significance of gender in the history of energy and of energy transitions in the history of women and gender By foregrounding women s energetic labours and concerns the authors shed new light on energy use in the past and provide important insights as societies move towards a carbon neutral future
