The Manager's Guide to Becoming a Leader Randy Clark, 2018-02. The Manager's Guide to Becoming a Leader is about service leadership; its philosophy is twofold: first, that projects can be managed but people should be led, and leaders aren't born, they're created. The book focuses on improving oneself as a person and as a leader. No single book or series of books could cover every contingency leaders face, fit every organization and answer every leadership question. However, a way of thinking, a leadership thought process can be shared. Leaders who have an employee-centric, influence-based leadership belief system can face most management obstacles and find the opportunity in them. If you, the reader, take nothing away from this book other than how service leaders think, I will be content and you will be a better leader.

Leadership Strategies in Organizations Ibrahim H Hussney,2023-02-17 Your success or failure as a manager will certainly depend on the leadership qualities that you enjoy without which you cannot generate the possibility of being a successful leader by helping your subordinates to find solutions to their practical and humanitarian problems alike You are involved with all the resources of the organization the business enterprise or the company in drawing and formulating strategies organizing and monitoring activities in order to achieve the goals choosing the appropriate ones from the organization s purposes and objectives and in making possible decisions for what needs to be done and motivating people to do so Thus leadership is the function of management that is largely involved in setting goals and motivating people to help achieve them One of the most important things that leaders do is set and define goals that the organization business enterprise or company wants to become a reality and help subordinates and guide them on the right way to achieve these goals It is possible for a person to be an effective manager a good planner and an organized administrator but at the same time lacks the motivational skills that a leader should have to direct the energy required to stimulate and motivate subordinates in the organization business enterprise or company Due to the complexity of business in organizations today towards managing them with the required speed and image through sound decision making and in order to raise the level of effective participation of all employees the choices of most organizations businesses projects and companies today focus on bringing in managers who possess the required leadership skills Since the issue of leadership has the main and fundamental role in the institutional change in business organizations as an abstract phenomenon characterized by ambiguity administrative leaders have been able to transform the goals related to the people they subordinate to a reality called the ability to create and highlight talents and their influence on those around them and from here leadership can be defined in the framework of administrative work as the process by which employees or workers can be influenced and persuaded to work in order to achieve the goals of the organization efficiently and effectively Leadership, the Leader ,1984
