After Leadership Brigid Carroll, Josh Firth, Suze Wilson, 2018-09-17 Leadership studies today resembles a bewildering

diversity of theories concepts constructs and approaches struggling in huge part for meaning relevance and impact As Dennis Tourish so eloquently puts it much of the literature suffers from unrelenting triviality and sterile preoccupations Seeking to create a clean break from this current state of leadership studies After Leadership begins with the premise of a post apocalyptic world where only fragments of leadership science now remain echoing Alisdair McIntyre s imagining of such a scene as the basis for re establishing the foundations and focus of moral theory From these fragments the authors seek to construct a new leadership studies that challenges much of the established thinking on leadership exposes its limitations and biases and most importantly seeks to construct the foundations of a more inclusive participatory bold relational and social platform for leadership in the future After Leadership thus imagines a brave new world where what leadership is and what we seek from it can be developed anew rather than remaining bound up in the problematic traditions and preoccupations that characterise leadership studies today Offering both full length chapter explorations that explore new ways of understanding and practicing leadership as well as shorter essays that aim to provoke further reflection on leadership and what we seek of it After Leadership offers a uniquely critical and creative collection that will inspire students scholars and leadership educators to reconsider their understanding and practice of leadership

Peer-to-Peer Leadership

Mila N. Baker, 2014-01-06 Our leadership models are stuck in an Industrial Age top down mentality But in our complex data drenched 24 7 world there is simply too much information coming from too many different directions too quickly for any one leader or group to stay on top of it Hierarchy is breaking down everywhere why should leadership be any different Inspired by the peer to peer model of computing used in social networking and crowdsource technologies Mila Baker shows a new way to lead Organizations she says must become networks of equipotent nodes of power peer leaders The job of the leader is now to set the overall goals and direction and optimize the health of that network not tell it what to do In these organizations leadership roles shift rapidly to fit the needs of any given situation Information flows freely so those who need it can find it easily and act on it immediately Feedback becomes an organic part of the workflow enabling rapid course corrections Baker shows how companies like Gore and Herman Miller have achieved long term success practicing these principles and provides a structure that any organization can adapt to build flexibility resiliency and accountability
