The Legacy of World War II in European Arthouse Cinema Sam Deighan, 2021-06-11 World War II irrevocably shaped culture and much of cinema in the 20th century thanks to its devastating global impact that changed the way we think about and portray war This book focuses on European war films made about the war between 1945 and 1985 in countries that were occupied or invaded by the Nazis such as Poland France Italy the Soviet Union and Germany itself Many of these films were banned censored or sharply criticized at the time of their release for the radical ways they reframed the war and rejected the mythologizing of

war experience as a heroic battle between the forces of good and evil The particular films examined made by arthouse directors like Pier Paolo Pasolini Rainer Werner Fassbinder and Larisa Shepitko among many more deviate from mainstream cinematic depictions of the war and instead present viewpoints and experiences of WWII which are often controversial or transgressive They explore the often complicated ways that participation in war and genocide shapes national identity and the ways that we think about bodies and sexuality trauma violence power justice and personal responsibility themes that continue to resonate throughout culture and global politics

Nuclear War Raymond G. Wilson, 2014 Nuclear War Hiroshima Nagasaki and A Workable Moral Strategy for Achieving and Preserving World Peace Raymond G Wilson The real truth of the matter is as you and I know that a financial element in the large centers has owned the government of the United States since the days of Andrew Jackson Franklin D Roosevelt There is considerable reason to believe President Roosevelt s statement is quite true thus the financial element in the large centers shares responsibility and blame for the tens if not hundreds of thousands of war deaths in the last two decades The people of the world need protection from those responsible for provoking nations to war In the United States this responsibility lies with all elements in the highest levels of government the decision makers It lies with those who tinker with political and economic machinations most likely for the advantage of a financial element in the large centers These are probably people young enough and sufficiently uninformed to have no conception of the atrocity of the nuclear confrontations and conflagrations to which they are quite possibly leading the world This group of people may include most people serving in the U S Congress and from personal experience many in the U S Military I have my doubts whether Presidents have seen all of the results of the world s first nuclear war they are probably shielded from this Photographs of the victims were confiscated and held confidential for more than 22 years after 1945 There were well more than 210 000 victims not many photographs were made and survived You can learn from this book a tiny fraction of the truth about what happens to people caught in nuclear war Although the truth from more than 210 000 will never be heard In a

future war there would be hundreds of thousands more likely hundreds of millions of victims The United States government has not revealed this kind of truth about its first nuclear war As of early 2014 no sitting president has ever visited Hiroshima or Nagasaki In Chapter 5 a solution is suggested to save us all from our nuclear madness I hate war as only a soldier who has lived it can only as one who has seen its brutality its futility its stupidity Dwight D Eisenhower we also possess the seeds of goodness and justice that humankind was given by nature and has fostered over the ages We have the ability to cultivate self control and consideration for others and to strive to live together in a humane and harmonious manner with others The revival of such true humanity not only between individuals but also between nations is an absolute necessity today for the age has come when one nation s self centered behavior could lead all humanity to annihilation Naomi Shohno 1986 America can do whatever we set our mind to Barack Obama The Silent Touch Pasquale De Marco,2025-07-13 In the aftermath of the atomic bombings of Hiroshima and Nagasaki a young geneticist named Dr James Schull embarked on an extraordinary odyssey to Japan to investigate the genetic damage among the children of survivors known as hibakusha This book is a moving account of his journey a testament to the resilience of the human spirit and an urgent call for peace and nuclear disarmament With meticulous care and unwavering empathy Dr Schull delved into the lives of the hibakusha listening to their heart wrenching stories of loss resilience and the indomitable spirit that enabled them to rebuild their lives amidst unimaginable suffering Through their testimonies he gained a deeper understanding of the physical and psychological scars left by the atomic bombings scars that extended far beyond the visible wounds Dr Schull s research unveiled the devastating effects of radiation on human DNA revealing an increased incidence of birth defects childhood cancers and a heightened susceptibility to various diseases among the children of hibakusha His work provided invaluable insights into the genetic consequences of nuclear warfare underscoring the urgent need for nuclear disarmament and the pursuit of peace Beyond the scientific realm Dr Schull s journey in Japan transformed his own life fostering a profound sense of compassion and an unwavering commitment to advocating for the hibakusha and their families He marveled at the beauty of the Japanese culture the warmth of its people and the profound sense of communal spirit that enabled them to rise from the ashes of war This book is not only a historical account of Dr Schull s odyssey but also a timeless meditation on the human condition the power of resilience and the importance of peace It is a call to action urging readers to reflect on the devastating consequences of nuclear weapons and to join the movement for a world free from the threat of nuclear annihilation Through Dr Schull s eyes we witness the resilience of the human spirit the power of scientific inquiry and the urgent need for peace and reconciliation in a world scarred by conflict His legacy lives on in the countless lives he touched the scientific knowledge he imparted and the unwavering hope he instilled in the hearts of those affected by the atomic bombings of Hiroshima and Nagasaki If you like this book write a review Nuclear Legacy: Tales from Atomic Scientists Pasquale De Marco,2025-04-12 In Nuclear Legacy Tales from Atomic Scientists we embark on a captivating journey through the history

Cinematic Reflections on The Legacy of the Holocaust Diana Diamond, Bruce Sklarew, 2018-08-06 An international group of psychoanalysts and film scholars address the enduring emotional legacy of the Holocaust in *Cinematic Reflections on the Legacy of the Holocaust Psychoanalytic Perspectives* Particular focus is given to how second and third generation survivors have explored and confronted the psychic reverberations of Holocaust trauma in cinema This book focuses on how film is particularly suited to depict Holocaust experiences with vividness and immediacy The similarity of moving images and sound to our dream experience allows access to unconscious processing Film has the potential to reveal the vast panorama of Holocaust history as well as its intrapsychic reverberations Yet despite the recent prominence of Holocaust films documentaries and TV series as well as scholarly books and memoirs these works lack a psychoanalytic optic that elucidates themes such as the repetition compulsion survival guilt disturbances in identity and disruption of mourning that are underlying leitmotifs *Cinematic Reflections on the Legacy of the Holocaust* will be of great interest to psychoanalysts and therapists as well as to scholars in trauma film and Jewish studies It is also of interest to those concerned with the prevention of genocide and mass atrocities and their long term effects
