The Cygnus Key Andrew Collins, 2018-05-15

New evidence showing that the earliest origins of human culture religion and technology derive from the lost world of the Denisovans Explains how G bekli Tepe and the Giza pyramids are aligned with the constellation of Cygnus and show evidence of enhanced sound acoustic technology Traces the origins of G bekli Tepe and the Giza pyramids to the Denisovans a previously unknown human population remembered in myth as a race of giants Shows how the ancient belief in Cygnus as the origin point for the human soul is as much as 45 000 years old and originally came from southern Siberia Built at the end of the last ice age around 9600 BCE G bekli Tepe in southeast Turkey was designed to align with the constellation of the celestial swan Cygnus a fact confirmed by the discovery at the site of a tiny bone plaque carved with the three key stars of Cygnus Remarkably the three main pyramids at Giza in Egypt including the Great Pyramid align with the same three stars But where did this ancient veneration of Cygnus come from Showing that Cygnus was once seen as a portal to the sky world Andrew Collins reveals how at both sites the attention toward this star group is linked with sound acoustics and the use of musical intervals discovered thousands of years later by the Greek mathematician Pythagoras Collins traces these ideas as well as early advances in human technology and cosmology back to the Altai Baikal region of Russian Siberia where the cult of the swan flourished as much as 20 000 years ago He shows how these concepts including a complex numeric system based on long term eclipse cycles are derived from an extinct human population known as the Denisovans Not only were they of exceptional size the ancient giants of myth but archaeological discoveries show that this previously unrecognized human population achieved an advanced level of culture including the use of high speed drilling techniques and the creation of musical instruments The author explains how the stars of Cygnus coincided with the turning point of the heavens at the moment the Denisovan legacy was handed to the first human societies in southern Siberia 45 000 years ago catalyzing beliefs in swan ancestry and an understanding of Cygnus as the source of cosmic creation It also led to powerful ideas involving the Milky Way s Dark Rift viewed as the Path of Souls and the sky road shamans travel to reach the sky world He explores how their sound technology and ancient cosmologies were carried into the West flowering first at G bekli Tepe and then later in Egypt s Nile Valley Collins shows how the ancient belief in Cygnus as the source of creation can also be found in many other cultures around the world further confirming the role played by the Denisovan legacy in the genesis of human civilization

How We Became Human Pierpaolo Antonello, Paul Gifford, 2015-10-01 From his groundbreaking *Violence and the Sacred*

and Things Hidden since the Foundation of the World Ren Girard's mimetic theory is presented as elucidating the origins of culture He posits that archaic religion or the sacred particularly in its dynamics of sacrifice and ritual is a neglected and major key to unlocking the enigma of how we became human French philosopher of science Michel Serres states that Girard's theory provides a Darwinian theory of culture because it proposes a dynamic shows an evolution and gives a universal explanation This major claim has however remained underscrutinized by scholars working on Girard's theory and it is mostly overlooked within the natural and social sciences Joining disciplinary worlds this book aims to explore this ambitious claim invoking viewpoints as diverse as evolutionary culture theory cultural anthropology archaeology cognitive psychology ethology and philosophy The contributors provide major evidence in favor of Girard's hypothesis Equally Girard's theory is presented as having the potential to become for the human and social sciences something akin to the integrating framework that present day biological science owes to Darwin something compatible with it and complementary to it in accounting for the still remarkably little understood phenomenon of human emergence
