technologies during execution of Foundation Engineering and Underground Structures Tunnelling Finally the fourth column relies on a certain feeling of geological environment which Terzaghi 1959 denotes as capacity for judgment and he specifies that this capacity can be gained only by years of contact with field conditions The authors are confident that the third column relevant to practical application should be strengthened about Earth Structures about application on structures which belong to the oldest engineering structures utilizing the fundamental structural material soil At the same time they believe that Earth Structures will establish their position in the near future as it is gaining another interesting field which Earth Structures are also part of namely the field of Environmental Geotechnics
