The Limits Of Intervention:

The Limits of Intervention (an Inside Account of how the Johnson Policy of Escalation in Vietnam was Reversed) Townsend Hoopes, 1970 *The Limits of Intervention: an Inside Account of how the Johnson Policy of Escalation in Vietnam was Reserved* Townsend Hoopes, 1969 The ECU and European Monetary Integration P. de Grauwe, 1988-10-28

The creation of the ECU in 1979 as part of the newly established European Monetary system was greeted with widespread scepticism few predicted the success it would have in private financial markets The macroeconomic and microeconomic implications of the ECU and its significance for monetary integration in Europe are considered by a variety of contributors from academics to those in banking circles Current research is examined and the theoretical and empirical aspects of the emergence of the ECU as a vehicle for European policy making are considered to provide insights as to its future development The Limits of Ethics in International Relations David Boucher, 2011-05-05

Ethical constraints on relations among individuals within and between societies have always reflected or invoked a higher authority than the caprices of human will For over two thousand years Natural Law and Natural Rights were the constellations of ideas and presuppositions that fulfilled this role in the west and exhibited far greater similarities than most commentators want to admit Such ideas were the lens through which Europeans evaluated the rest of the world In his major new book David Boucher rejects the view that Natural Rights constituted a secularisation of Natural Law ideas by showing that most of the significant thinkers in the field in their various ways believed that reason leads you to the discovery of your obligations while God provides the ground for discharging them Furthermore the book maintains that Natural Rights and Human Rights are far less closely related than is often asserted because Natural Rights never cast adrift the religious foundationalism whereas Human Rights for the most part have jettisoned the Christian metaphysics upon which both Natural Law and Natural Rights depended Human Rights theories on the whole present us with foundationless universal constraints on the actions of individuals both domestically and internationally Finally one of the principal contentions of the book is that these purportedly universal rights and duties almost invariably turn out to be conditional and upon close scrutiny end up being special rights and privileges as the examples of multicultural encounters slavery and racism and women s rights demonstrate *On the Limits of the Law* Stephen C. Halpern, 1995

On the Limits of the Law is Stephen Halpern s compelling examination of the legal struggle to control the enforcement of Title VI of the 1964 Civil Rights Act the historic provision prohibiting racial discrimination in programs receiving federal financial assistance Although the provision appeared to have immense power to fight racial inequality in education Halpern argues attacking the problem through legal rights and litigation distorted our understanding of educational inequality based on race and limited the remedies used to address it Stephen Halpern has made a substantial and original contribution to the analysis of law and civil rights Concentrating on original or primary sources and including very informative interviews he offers a superb review of the historical and political context of the Civil

Rights Act of 1964 and the United States Supreme Court's desegregation decisions All who are interested in civil rights history and enforcement the administrative process and the role of courts in pursuing racial and social justice will want to read this book Kenneth Tollett Howard University

Survival October-November 2021: The Limits of Power The International Institute for Strategic Studies (IISS), 2023-04-21 Survival the IISS's bimonthly journal challenges conventional wisdom and brings fresh often controversial perspectives on strategic issues of the moment In this issue Anatol Lieven argues that realist support for prudence and restraint in foreign policy does not equate to chauvinism isolationism and opposition to international cooperation Toby Dodge assesses that the United States attempt to comprehensively transform Afghanistan was based on its erroneous presumption that the liberal peacebuilding model was universally applicable Audrey Kurth Cronin contends that the logic of fighting terrorists far from the US homeland no longer holds as the US faces resource constraints and rising domestic terrorism Jens Ringsmose and Sten Rynning analyse the potential priorities and scope of NATO's next Strategic Concept and how it can bridge the Alliance's political military divide And eight more thought provoking pieces as well as our regular Book Reviews and Noteworthy column Editor Dr Dana Allin Managing Editor Jonathan Stevenson Associate Editor Carolyn West Assistant Editor Jessica Watson

Limits of Love Gilbert Meilaender, 2010-11-01 Reflecting upon some problems of the moral life Gilbert Meilaender considers their difficulties within a vision that accentuates not only the limits but also the promise of the Christian story Created by God as finite beings we make particular attachments Redeemed by God for a community transcending nature and history our love always carries us beyond the special bonds of time and place We live therefore with a sense of permanent tension If this tension heightens our sense of the perplexities of life it should not free us from the obligation to probe clarify and where we can resolve some of those difficulties The author holds that theological ethics must clarify the direction for growth and development within the Christian life He undertakes such analysis emphasizing throughout the limits of the human condition the importance of our nature as embodied persons and the danger and pretension in some of our attempts to take control of and master human life This Christian vision is developed in chapters that explore a range of moral problems such as abortion artificial reproduction euthanasia care for defective infants provision of artificial nutrition and hydration and marital and political community These are throughout however theological explorations Taken together they illumine not only particular problems of the moral life but a vision of life classically Christian in its conception humane in its care for particular bonds of attachment and modest in its recognition of moral limits on our ability to seek the good Meilaender has developed a broad recognition both among scholars and students of ethics and among interested general readers He has the capacity to throw fresh angles of vision on complex problems so as to help both the sophisticated and the uninitiated reader to think more penetratingly about moral questions

International Law and the Principle of Non-Intervention Marco Roscini, 2024 This book provides a systematic analysis of the principle of non intervention from a historical theoretical and systematic perspective Roscini argues that the

principle is strictly linked to some fundamental notions of international law such as sovereignty use of force self determination and human rights protection The Limits of Common Humanity Samuel Jarvis,2022-06-27 What motivates states to protect populations threatened by mass atrocities beyond their own borders Most often states and their representatives appeal to the principle of common humanity acknowledging a conscience shocking quality that demands a moral response But though the idea of a common humanity is powerful the question remains to what extent is it effective in motivating action The Limits of Common Humanity provides an ambitious interdisciplinary response to this question theorizing the role of humanity as a motivational concept by building on insights from international relations political philosophy and international law Through this analysis Samuel Jarvis examines the influence the concept of humanity has had on the creation and mission of the Responsibility to Protect R2P commitment while highlighting the challenges that have restricted its application in practice By providing a new framework for thinking about how political legal and moral arguments interact during the process of collective decision making Jarvis explores the contradictory ways in which states approach the protection of human beings from mass atrocity crimes both domestically and internationally In the context of a rapidly changing global order The Limits of Common Humanity is a timely reappraisal of the R2P concept and its future application arguing for a more politically motivated response to human protection that moves beyond an appeal for morality

The New Republic Herbert David Croly,1918 **Prevention and the Limits of the Criminal Law** Andrew Ashworth,Lucia Zedner,Patrick Tomlin,2013-01-31 Exploring the principles and values that should guide and limit the state s use of preventive techniques that involve coercion against the individual this volume arises from a three year study of Preventive Justice The contributions examine whether and when preventive measures are justified whether within or outwith the criminal law and whether they signal a larger change in the architecture of security Preventive measures include controversial crime control approaches such as pre inchoate offences pre trial detention restraining orders and prevention detention of the dangerous There are good reasons to justify state use of coercion to protect the public from harm but while the rationales and justifications for state punishment have been extensively explored the scope limits and principles of preventive justice have not received the same attention This volume written by world renowned scholars from different disciplinary backgrounds and jurisdictions redresses the balance assessing the foundations for the range of coercive measures that states now take in the name of prevention and public protection Wheaton's Elements of International Law

Henry Wheaton,1929 **EU Executive Discretion and the Limits of Law** Joana Mendes,2019 This edited collection analyses how the law governs and should govern the exercise of discretion by the EU s executive powers in light of post 2010 developments which have expanded such powers **The Practice of Humanitarian Intervention** Kai

Koddenbrock,2015-08-27 This book examines the practices in Western and local spheres of humanitarian intervention and shows how the divide between these spheres helps to perpetuate Western involvement Using the Democratic Republic of the

Congo as a case study an object of Western intervention since colonial times this book scrutinizes the contemporary practice of humanitarian intervention from the inside It seeks to expose how humanitarian aid and peacekeeping works what obstacles they encounter and how they manage to retain their legitimacy By examining the relationship between the West and the DR Congo this volume asks why intervention continues to be so central for the relationship between Western and local spheres Why is it normal and self evident The main answer developed here is that the separation of these two spheres allows intervention to enjoy sufficient degrees of legitimacy to be sustained Owing to the contradictions that surface when juxtaposing the Western and Congolese spheres this book highlights how keeping them separate is key to sustaining intervention Bridging the divide between the liberal peace debate in International Relations and anthropologies of humanitarianism this volume thus presents an important contribution to taking both the legitimizing proclamations and local realities of intervention seriously The book will be of much interest to students of statebuilding peacebuilding peacekeeping anthropology research methods and IR in general The American Economy: A Student Study Guide Wade L.

Thomas,Robert B. Carson,2015-03-26 A student study guide to accompany the principle work The American economy how it works and how it doesn't **The Divine Trinity** David Brown,1985 Description This book the first serious analysis of the doctrine of the Trinity for many years presents a defense against the conservative treatment of the Trinity as an impenetrable mystery and against the radical position that the doctrine is incoherent and therefore unacceptable Brown favors the founding of a new discipline of philosophical theology or the widening of the horizons of the philosophy of religion to apply more widely the type of penetration of theology by philosophy that he exemplifies in his treatment of the Trinity He argues for belief in an interventionist God theism rather than deism and contends that biblical criticism and historical research do not imply the abandonment of Christian belief since the historical original should not be equated with theological truth Although historical difficulties must prevent any literal acceptance of the Gospel accounts in toto the true Christ can be disentangled from the historical Jesus by philosophical method Wide ranging in scope rigorous and candid in argument Brown's work will prove of interest to educated Christian laypersons and others beyond the boundaries of professional theology and philosophy of religion Perhaps most provocative is Brown's assertion that the Resurrection must be accepted as a literally true visionary experience and that anyone who accepts it must be prepared to take seriously other visionary experiences for example visions of the Virgin Mary even if he rejects them in the end It is certainly an astonishing truth that God should be so interested in a being of such vastly inferior powers as man says the author But that clearly must be the implication of the doctrine of the Trinity To have reached this conclusion by means of philosophical argument is to have taken a major step toward the complete penetration of theology by philosophy that Brown calls for About the Contributor's David William Brown FBA is an Anglican priest and theologian who currently serves as Professor of Theology Aesthetics and Culture in the Institute for Theology Imagination and the Arts and as Wardlaw Professor at St Mary's College University of St
