The Limits To Capital:

The Limits to Capital David Harvey, 2006 An exciting insightful exposition and development of Marx's critique of political economy The Limits to Capital David Harvey, 1999 The Limits to Capital David Harvey, 2018-11-06 A major rereading of Marx's critique of political economy Now a classic of Marxian economics *The Limits to Capital* provides one of the best theoretical guides to the history and geography of capitalist development In this edition Harvey updates his seminal text with a substantial discussion of the turmoil in world markets today Delving into concepts such as fictitious capital and uneven geographical development Harvey takes the reader step by step through layers of crisis formation beginning with Marx's controversial argument concerning the falling rate of profit and closing with a timely foray into the geopolitical and geographical implications of Marx's work *The Limits to Capital in Spain* G. Charnock, T. Purcell, R. Ribera-Fumaz, 2014-02-18 Spain is at the epicentre of a crisis that threatens the future of the Eurozone This book explains the deep historical and structural roots of the current crisis in Spain It analyses the nexus between European circuits of financial capital urbanisation and the emergent dynamics of state austerity and popular revolt **The Limits to Capital** David Harvey, 1982-01-01 *The Structural Crisis of Capital* Istvan Meszaros, 2010-03-01 In this collection of trenchant essays and interviews Istvan Meszaros the world's preeminent Marxist philosopher and winner of the 2008 Libertador Award for Critical Thought the Bolivar Prize lays bare the exploitative structure of modern capitalism He argues with great power that the world's economies are on a social and ecological precipice and that unless we take decisive action to radically transform our societies we will find ourselves thrust headfirst into barbarism and environmental catastrophe Meszaros however is no pessimist He believes that the multiple crises of world capitalism will encourage the working class to demand center stage in the construction of a new system of production and distribution designed to meet human needs rather than serve the relentless pursuit of profit a struggle which is already underway in places such as Venezuela As John Bellamy Foster says in the foreword to this indispensable book Today the structural crisis of capital provides the historical setting for a new revolutionary movement for social emancipation in which developments normally taking centuries would flit by like phantoms in decades or even years But the force for such necessary vital change remains with the people themselves and rests on humanity's willingness to constitute itself as both subject and object of history through the collective struggle to create a just and sustainable world This Meszaros insists constitutes the unprecedented challenge and burden of our historical time **A Companion To Marx's Capital** David Harvey, 2018-11-06 In recent years we have witnessed a surge of interest in Marx's work in the effort to understand the origins of our current predicament For nearly forty years David Harvey has written and lectured on Capital becoming one of the world's most foremost Marx scholars Based on his recent lectures this current volume finally bringing together his guides to Volumes I II and much of III of *Das Kapital* aims to bring this depth of learning to a broader audience guiding first time readers through a fascinating and deeply rewarding text *A Companion to*

Marx's Capital offers fresh original and sometimes critical interpretations of a book that changed the course of history and as Harvey intimates may do so again David Harvey's video lecture course can be found here davidharvey.org/reading-capital

The Ecological Crisis and the Logic of Capital Xueming Chen,2017-09-11 The worsening environmental crisis has become a serious threat to mankind The search for a solution to this crisis must begin by understanding its causes Taking an eco socialist perspective The Ecological Crisis and the Logic of Capital explores the logic of capitalism as a fundamental cause of today s environmental crisis in particular the thirst for profit and the capitalist mode of production By demonstrating the inherent antagonism between capital and ecology this book argues that proposals to resolve the crisis within the capitalist system are utopian that proposed remedies relying on scientific progress alternative energies low carbon technologies or the introduction of ecological ethics and new attitudes toward Nature into market mechanisms are doomed to failure without a radical overhaul of the principles that govern capitalism
