Thumb Steven James Gold, 1983 **The Way of the Panda** Henry Nicholls, 2012-06-01 Learn how the extraordinary impact of the panda from obscurity to fame is also the story of China's transition from shy beginnings to center stage Giant pandas have been causing a stir ever since their formal scientific discovery just over 140 years ago Yet in spite of humankind's evident obsession with the giant panda it is only in the last few decades that scientific research has begun to show us what this mysterious frequently misunderstood creature is really like Henry Nicholls uses the rich and curious history of the giant panda to do several things to ponder our changing attitudes toward the natural world to offer a compelling history of the conservation movement and to chart the rise of modern China on its journey to become the self-sufficient twenty-first century superpower it is today **Theism and Explanation** Gregory W. Dawes, 2012-09-10 In this timely study Dawes defends the

methodological naturalism of the sciences Though religions offer what appear to be explanations of various facts about the world the scientist as scientist will not take such proposed explanations seriously Even if no natural explanation were available she will assume that one exists Is this merely a sign of atheistic prejudice as some critics suggest Or are there good reasons to exclude from science explanations that invoke a supernatural agent On the one hand Dawes concedes the bare possibility that talk of divine action could constitute a potential explanation of some state of affairs while noting that the

conditions under which this would be true are unlikely ever to be fulfilled On the other hand he argues that a proposed explanation of this kind would rate poorly when measured against our usual standards of explanatory virtue *Panda Nation* E. Elena Songster,2018-03-16 A logo on products ranging from chopsticks and toilet paper to cell phones and automobiles the panda is one of the most ubiquitous images in China and throughout the world Yet the panda holds little notable historical significance in China Although it has existed in the territory of present day China since the Pliocene epoch its widespread popularity there is not only recent but almost sudden In *Panda Nation* E Elena Songster links the emergence of the giant panda as a national symbol to the development of nature protection in the People s Republic of China The panda s transformation into a national treasure exemplifies China s efforts in the mid twentieth century to distinguish itself as a nation through government directed science and popular nationalism The story of the panda s iconic rise offers a striking reflection of China s recent and dramatic ascent as a nation in global status **Writing That Makes Sense, 2nd Edition** David S. Hogsette,2019-11-05 The second edition of *Writing That Makes Sense* takes students through the fundamentals of the writing process and explores the basic steps of critical thinking Drawing upon over twenty years of experience teaching college composition and professional writing David S Hogsette combines relevant writing pedagogy and practical assignments with the basics of critical thinking to provide students with step by step guides for successful academic writing in a variety of rhetorical modes New in the second edition Expanded discussion of how to write effective thesis statements for informative persuasive evaluative and synthesis essays including helpful thesis statement templates Extensive templates introducing students to conventions of academic discourse including integrating outside sources interacting with other writers ideas and dialoguing with multiple perspectives Examples of academic writing from different disciplines illustrating essay titles abstracts thesis statements introductions conclusions and voice Expanded discussion of voice in academic writing including an exploration of active and passive voice constructions in different disciplines and tips on how to edit for clarity A new chapter on writing in the disciplines Updated sample student papers New readings with examples of opposing views and multiple perspectives [Finding Wholeness Through the Science of Connecting](#) Victor MacGill,2025-01-30 Drawing on the author s decades of experience in social work this book introduces readers to a systems approach to reconnecting in a complex disconnected world applying the Dynamics of Life model The systems sciences allow us to explore how we connect and disconnect which can help us find ourselves again Through his Dynamics of Life model Victor MacGill presents this science in a simple understandable way so that practitioners can build their skills and learn methods to apply with clients The beginning of the book introduces theoretical concepts such as complex adaptive systems living systems and 4e cognition The second half introduces tools for how to manage conflict and to reconnect and rebuild relationships with ourselves individuals family and community The book is a manual for reconnecting ourselves to ourselves others and the world to realise our greater potential An essential resource in a disconnected and fragmented world this book is for anyone in the
