the teacher to examine oral tradition and its manifestation in folklore The introductory section discusses the nature and forms of the folktale A comprehensive second part traces the folktale geographically from Ireland to India giving culturally diverse examples of the forms presented in the first part The examples are followed by the analysis of several themes in such tales from North American Indian cultures The concluding section treats theories of the folktale the collection and classification of folk narrative and then analyzes the living folklore process This work will appeal to students of the sociology of literature professors of comparative literature and general readers interested in folklore **Dragon** Martin

Arnold,2018-06-15 From the fire breathing beasts of North European myth and legend to the Book of Revelation s Great Red Dragon of Hell from those supernatural agencies of imperial authority in ancient China to the so called dragon women who threaten male authority dragons are a global phenomenon one that has troubled humanity for thousands of years These often scary beasts take a wide variety of forms and meanings but there is one thing they all have in common our fear of their formidable power and as a consequence our need either to overcome appease or in some way assume that power as our own In this fiery cultural history Martin Arnold asks how these unifying impulses can be explained Are they owed to our need to impose order on chaos in the form of a dragon slaying hero Is it our terror of nature writ large unleashed in its most destructive form Or is the dragon nothing less than an expression of that greatest and most disturbing mystery of all our mortality Tracing the history of ideas about dragons from the earliest of times to Game of Thrones Arnold explores exactly what it might be that calls forth such creatures from the darkest corners of our collective imagination **The Serpent**

How did Iran remain distinctively Iranian in the centuries which followed the Arab Conquest How did it retain its cultural distinctiveness after the displacement of Zoroastrianism state religion of the Persian empire by Islam This latest volume in

The Idea of Iran series traces that critical moment in Iranian history which followed the transformation of ancient traditions during the country's conversion and initial Islamic period. Distinguished contributors who include the late Oleg Grabar, Roy Mottahedeh, Alan Williams, and Said Amir Arjomand discuss from a variety of literary, artistic, religious, and cultural perspectives the years around the end of the first millennium CE when the political strength of the Abbasid Caliphate was on the wane and when the eastern lands of the Islamic empire began to take on a fresh Persianate or Perso-Islamic character. One of the paradoxes of this era is that the establishment throughout the eastern Islamic territories of new Turkish dynasties coincided with the genesis and spread into Central and South Asia of vibrant new Persian language and literatures. Exploring the nature of this paradox, separate chapters engage with ideas of kingship, authority, and identity and their fascinating expression through the written word, architecture, and the visual arts.

### **Glimpses into Other Worlds** Kristy

Shanahan, 2025-04-18. Glimpses into Other Worlds will take you on a personal journey through other times and dimensions. It is mostly nonfiction but also stretches the imagination to consider other possibilities and controversies. It is filled with spectacular images from NASA of our universe and other fantastic artwork. You will begin in our universe in the past and consider what some of the ancients thought about the heavens and gods from the heavens through their oral traditions, myths, legends, holy books, and history. From there you will read recent information on UFOs, now UAPs, and some recent well-known UFO incident reports. The words of the witnesses to these events give clear and compelling testimony and impact our limited knowledge of our universe. Then we will examine some of the scientific and technological wonders of what science tells us about our universe. From there you will consider other dimensions from differing perspectives. You will look at ancient oral traditions, myths, legends, and historical beliefs about other dimensions, other worlds, realms. You will learn what scientists currently theorize about other dimensions. Finally, you consider the inner dimension or realm. You will learn about recent prophets, psychics, and scientific attempts to use their skills. Then you will seek the ancient wisdom of classic metaphysics, Hindu metaphysics, and the spirituality of diverse cultures. You will consider recent scientific support for connections between the consciousness of your mind and the entire universe through quantum physics. And this will return you to our universe again, hopefully with new insights into life. As T. S. Eliot said so well: "We shall not cease from exploration, and the end of all our exploring will be to arrive where we started and know the place for the first time." 1. Enjoy your explorations. 1. Eliot, T. S. from Little Gidding. Four Quartets. Main Edition. April 30, 2001, originally published in 1943.
