Slovar Voennykh Terminov:

The Soviet Army's High Commands in War and Peace, 1941-1992 Richard W. Harrison, 2022-07-28 The first full treatment of the unique phenomenon of High Commands in the Soviet Army during World War II and the Cold War The war on the Eastern Front during 1941-45 was an immense struggle running from the Barents Sea to the Caucasus Mountains The vast distances involved forced the Soviet political military leadership to resort to new organizational expedients in order to control operations along the extended front These were the high commands of the directions which were responsible for two or more fronts army groups and along maritime axes one or more fleets In all five high commands were created along the northwestern western southwestern and North Caucasus strategic directions during 1941-42 However the highly unfavorable strategic situation during the first year of the war as well as interference in day to day operations by Stalin severely limited the high commands effectiveness As a consequence the high commands were abolished in mid 1942 and replaced by the more flexible system of supreme command representatives at the front A High Command of Soviet Forces in the Far East was established in 1945 and oversaw the Red Army's highly effective campaign against Japanese forces in Manchuria The Far Eastern High Command was briefly resurrected in 1947 as a response to the tense situation along the Korean peninsula and the ongoing civil war in China but was abolished in 1953 soon after Stalin's death Growing tensions with China brought about the recreation of the Far Eastern High Command in 1979 followed a few years later by the appearance of new high commands in Europe and South Asia However these new high commands did not long survive the collapse of the Soviet Union in 1991 and were abolished a year later The book relies almost exclusively on Soviet and post communist archival and other sources and is the first unclassified treatment of this subject in any country East or West [The Russian Way of War](#) Richard W. Harrison, 2001 In this first comprehensive treatment of the subject Richard Harrison shows how this theory emerged and developed to become despite radically different political settings and levels of technology essential to the Red Army's victory over Germany in World War II *Soviet Military Operational Art* David M. Glantz, 1991 David Glantz examines the Soviet study of war the re emergence of the operation level the evolution of the Soviet theory of operations in depth before 1941 and its application in the European theatre and the Far East between 1941 and 1945 *The Operational Art* Bloomsbury Publishing, 1996-09-24 This work considers the modern antecedents and evolution of the operational art in military thought and practice in both peace and wartime This theme is developed over time and across military cultures A comparative framework allows the treatment of the overall theme by examining the concept of the operational art in the context of different nationalities different military organizations and different societies This study situates the current operational art in its historical context **Informing Statecraft** Angelo Codevilla, 2002-06-07 Analyzing the American intelligence network senior research fellow at Hoover Institution Angelo Codevilla concludes that American intelligence efforts are desperately outdated in this masterful exploration of the field Publishers Weekly Based on years of research and

experience working within the American intelligence network Angelo Codevilla argues that the intelligence efforts of the nation's government are outgrown and inconclusive. Suggesting that the evolution of American intelligence since the Vietnam War and World War II has been erratic and unplanned, Codevilla presents new efforts to be made within the intelligence network that would lead to strategized and effective methods of information gathering. Connecting the lines between a need for successful intelligence efforts and a strong government, Informing Statecraft warns of how intelligence failures of the past will eventually pale in comparison to the malaise that plagued American intelligence in the twentieth century.

Military Objectives in Soviet Foreign Policy Michael MccGwire, 2010-12-01 This study concentrates on the military roots of Soviet policy. It concentrates on how planning for the contingency of a world war shapes and distorts Soviet policy while producing a military posture and structure of forces that appear to the West as being far in excess of any legitimate defense needs. The focus is on the military technical aspects of doctrine which is the responsibility of the military to implement. The study does not dwell on the decisions that the Soviet political leaders would face in the course of a war except to note how the hierarchy of objectives would influence those decisions.

Soviet Military Operational Art Colonel David M. Glantz, 2012-11-12 David Glantz examines the Soviet study of war, the re-emergence of the operation level and its connection with deep battle, the evolution of the Soviet theory of operations in depth before 1941 and its refinement and application in the European theatre and the Far East between 1941 and 1945.

The Petrine Revolution in Russian Culture James Cracraft, 2009-07-01 The reforms initiated by Peter the Great transformed Russia not only into a European power but into a European culture, a shift argues Cracraft that was nothing less than revolutionary. The author of seminal works on visual culture in the Petrine era, Cracraft now turns his attention to the changes that occurred in Russian verbal culture.

Soviet Military Thinking Derek Leebaert, 2021-01-26 This book first published in 1981 examines the influences affecting Soviet military thinking, planning and theory in the later Cold War. It offers for the first time an insight into the range of premises and calculations surrounding the Soviet conception of power and makes the connection between Soviet studies and military strategy, a link often missed in the West. It discusses comparative doctrines, cultural differences, arms control and

specific security challenges between East and West
