Cardiovascular Risk Factors

Armen Yuri Gasparyan, 2012-03-14 Cardiovascular risk factors contribute to the development of cardiovascular disease from early life It is thus crucial to implement preventive strategies addressing the burden of cardiovascular disease as early as possible A multidisciplinary approach to the risk estimation and prevention of vascular events should be adopted at each level of health care starting from the setting of perinatology Recent decades have been marked with major advances in this field with the emergence of a variety of new inflammatory and immune mediated markers of heightened cardiovascular risk in particular The current book reflects some of the emerging concepts in cardiovascular pathophysiology and the shifting paradigm of cardiovascular risk estimation It comprehensively covers primary and secondary preventive measures targeted at different age and gender groups Attention is paid to inflammatory and metabolic markers of vascular damage and to the assessment of vascular function by noninvasive standardized ultrasound techniques This is a must read book for all health professionals and researchers tackling the issue of cardiovascular burden at individual and community level It can also serve as a didactic source for postgraduate medical students

The Effect of Interactivity in e-Learning Systems Chris Evans, Luis Palacios, 2014-07-18

This book is based on research conducted to investigate whether interactivity yields a learning effect when used appropriately in e Learning Systems and whether this effect enhances learning There is no doubt interactivity is vital in learning This statement is emphasized to such an extent that it is claimed that students with higher levels of interaction will obtain more positive and higher levels of achievement However little scientific evidence can be found to support this relationship The importance of this book is based on the fact that it provides evidence of the impact of interactivity on e Learning Systems considering the three main agents of an educational activity the learner the teacher and the environment In addition the concept of feedback as a key element in any interactive mechanism for enhancing learning is well documented in several studies throughout this book Three empirical studies are presented that investigated interactivity within the educational triangle These three studies were conducted based on the framework of positivism and action research paradigms The first study entitled *Interactive Pedagogical Feedback* gathers evidence for how highly interactive pedagogically designed formative feedback enhances students memory and understanding The second study entitled *Interactive Audio Feedback* examines whether the speed enhancements of oral feedback improve the conditions for the production of the lecturer s feedback and the quality of the feedback delivered to the students The final study *Interactive Texting Feedback* takes a pedagogical approach to provide formative feedback to a student audience using mobile text messages and determines whether *Interactive Texting Feedback* enhances the learning experience within the e Learning environment The information contained in the book is useful for academics and institutions to improve their teaching and the efficiency of their learning delivery mechanisms and will guide the design of instructional content It will also be of utility to

other researchers and those in roles that require an understanding of interactivity The Naturalists' Leisure Hour and Monthly Bulletin ,1892 Extreme Environmental Events Robert A.
