Women Entrepreneurs Across Racial Lines Andrea Smith-Hunter, 2006-01-01 One of the strengths of this book lies in the admirable literature reviews throughout the volume The authors reviews vast amounts of literature on women entrepreneurs and more specifically studies involving women minority entrepreneurs The nature of this task should not be underestimated given the ever expanding academic field of entrepreneurship and women s entrepreneurship in particular I read this book as an academic and would argue that it is of most use for academics students and professors and provides an up to date and well researched portrait of women entrepreneurs in the USA and beyond this book fills an important gap in the literature not only because there is a growing population of women entrepreneurs but also because of the growing number of minority women entering entrepreneurship Jodyanne Kirkwood *Women in Management Review* This book serves an important purpose It draws attention to the need for further research on ethnic minority women entrepreneurs Anne de Bruin *International Small Business Journal* This monograph provides a very comprehensive study of women entrepreneurs in the US and in many industrialized and developing countries Recommended General readers all levels of students faculty and professionals E P Hoffman *Choice* In this book Andrea E Smith Hunter interweaves quantitative findings with qualitative depth resulting in an informative and objective report of explanatory variables differences and similarities among women entrepreneurs from unlike racial backgrounds Among others she develops models of human capital dimensions network structures and entrepreneurial success L o Paul Dana *Journal of International Entrepreneurship* Women entrepreneurs command an increasingly large presence at the international and national levels A significant part of

this impact is due to growing numbers of minority women becoming entrepreneurs This volume provides some of the most comprehensive data to date on the topic of women entrepreneurs across racial lines It offers a systematic and conceptual framework for understanding issues of network structures and human and financial capital analyzed through a comparative analysis of minority and white women entrepreneurs The book begins by looking at the historical and current contributions of women in the labor market as well as literature related to women entrepreneurs Subsequent chapters take a critical and in depth look at white and minority entrepreneurs Later chapters examine the status of women entrepreneurs in the US followed by various analyses of their position in the global marketplace The book concludes with a set of action tools to aid women entrepreneurs as they navigate the road to economic success Through a well chosen sample rich analysis and insightful accounts Andrea E Smith Hunter compellingly details the challenges and opportunities faced by women entrepreneurs in today s marketplace Government agencies researchers entrepreneurs and those involved with the financial aspects of entrepreneurial ventures will find this volume of great interest

Bosses in British Business F. R. Jervis,2018-04-17 In this volume first published in 1974 the author provides an introduction to the historical development of management in business Success and failure in a commercial world can be explained partly in terms of economic forces but much also depends on the people on the management of the firms on the bosses The author approaches this topic by examining some of the major companies and individuals over the past two hundred years and examines how apparently secure and profitable companies at times run into great difficulties and shows that by examining the reasons for success and failure pitfalls may be avoided and efficiency improved This book will be of special value to business and commercial students as well as to the general reader who is interested in the problems of modern industry

International Entrepreneurship Sue Birley,1995 This edited collection presents the latest research on the international aspects of entrepreneurship The volume is divided into two sections Part One looks at conceptual issues in entrepreneurship including discussion on trust and the entrepreneur the importance of technology management and the facets of new business growth In Part Two the discussion centres around a wide range of international case studies including the role of networking in Japan foreign direct investment in research and development as entrepreneurship and the brewing industry in the UK The contributions illustrate the evolution of focus from the study of individual entrepreneurs firms and countries to the embedding of such players in the wider context of organizational regional and global environments and the interactions between them

Diversity and Entrepreneurship Andrea Smith-Hunter,2003 The global economy threatens the uniqueness of places people and experiences In Here and There Bill Conlogue tests the assumption that literature and

local places matter less and less in a world that economists describe as flat politicians believe has globalized and social scientists imagine as a global village Each chapter begins at home journeys elsewhere and returns to the author's native and chosen region northeastern Pennsylvania Through the prisms of literature and history the book explores tensions and conflicts within the region tensions and conflicts created by national and global demand for the area's resources fertile farmland forest products anthracite coal and college educated young people Making connections between local and global environmental issues Here and There uses the Pennsylvania watersheds of urban Lackawanna and rural Lackawaxen to highlight the importance of understanding and protecting the places we call home

The Role of International Exhibitions in Britain, 1850-1910 Anthony David Edwards, 2008 This book investigates these assumptions by systematically exploring the relationship between participation in international exhibitions the state of the economy and the issue of technical education from a British perspective between 1850 and 1910

Handbook for Creative Team Leaders Tudor Rickards, Susan Moger, 2017-07-05 Every worthwhile organization strives

continuously to improve What the authors of this groundbreaking book offer is nothing less than a system for achieving peak performance As a result of their work with more than 2000 teams in some 40 countries across the globe the authors identified the 7 factors that distinguish what they call dream teams and on that basis they developed the structured approach described in the Handbook Part I sets out the principles that underlie team performance Part II shows how to train teams to become more creative Finally in Part III the authors demonstrate their ideas in action with real life examples from a wide variety of organizational settings They emphasize throughout the role of leadership in stimulating creativity and innovation and they explain how to inject new dynamism into existing organizational systems and practices Anyone involved in teamworking would profit from a close study of the Handbook It will be especially valuable to team leaders and facilitators to project managers and to HRD practitioners and consultants Machinery ,1902 **Machinery** Lester Gray French,1901

Atindex ,1984 **Shopkeepers and Master Artisans in Nineteenth-Century Europe** Geoffrey

Crossick,Heinz-Gerhard Haupt,2016-07-01 First published in 1984 Shopkeepers and master artisans had a striking presence in the history of nineteenth century Europe not only in the development of industrial and urban economies but also the fabric of social life and the politics of protest The experience of 1848 the differing pace of various forms of nationalism and liberalism and at the end of the century the shift towards right wing nationalist or Catholic political movements reflected a developing crisis in the petite bourgeoisie The essays examine the nature of this crisis and ask critical questions about the social relations of the petite bourgeoisie with the developing working classes This book as a whole provides a fresh and integrated approach to the world of these shopkeepers and master artisans and illuminates much else besides in the social history of nineteenth century Europe **The Rise of Management Consulting in Britain** Michael Ferguson,2019-05-24

This title was first published in 2002 The history of management consulting in Britain is a subject that has received little attention in the past in terms of research or publication This work redresses the gap in the knowledge base of business and management history presenting the historical situation in the context of management consulting Identifying the beginnings of consultancy services in the mid nineteenth century Ferguson charts its progression through a series of time frames that span the twentieth century Utilizing a series of consistent themes such as service delivery forms and training which can be compared and contrasted across time the book provides not only a history of management consultancy services but also shows how the take up and form of services was heavily dependent upon the prevailing attitudes within business to the role of management The thoroughly researched and well presented arguments in this book will greatly add to our knowledge of British management during the twentieth century **De Gruyter Handbook of Business Families** Michael

Carney,Marleen Dieleman,2023-01-30 The management field increasingly recognizes that most firms in the world are family firms and that these entities operate differently from the non family firms on which most of our current management theories are based The De Gruyter Handbook of Business Families brings together work from leading academics who explore

emerging research themes relevant to business families particularly drawing in new insights from adjacent disciplines that can advance the family business field The handbook challenges the traditional notion of the single firm single family that has characterized most early research on family business Recognizing that families may simultaneously own or control multiple businesses as well as substantial wealth beyond these firms in the form of financial and non financial assets this handbook focuses on business families rather than the narrower construct of family business The contributions in this handbook explore the relatively neglected dynamics between individuals with family ties that shape the interaction between family and business business families with multiple businesses how business families adopt formal rules and processes around their joint activities and the institutionalization of wealth and business families in society The De Gruyter Handbook of Business Families fills a gap in the family business research literature and is an essential reference work for researchers and graduate level students in the area of business families

Social Mobility in Industrial Society Seymour Martin Lipset, Reinhard Bendix, 2024-06-21 Where else but in America captains of industry are fond of saying could a penniless immigrant like Andrew Carnegie achieve so much Any place else that has reached the same stage of industrial development is the answer implicit in *Social Mobility* The authors conclude somewhat surprisingly that is not noticeably easier to pull oneself up by the bootstraps in the Land of Opportunity than it is in a number of other countries The very process of industrialization with its growing demands for skilled management prevents an elite in any nation from permanently establishing itself in a position of exclusive superiority Even in states where neither political institutions nor official ideologies favor upward mobility increasing industrialization requires a growing and consequently a changing elite class The authors are concerned primarily with mobility in the total population with movements into and out of the working class though they report extensively on the social origins of business leaders in various countries They deal too with the different values of different societies and with the motivation of the socially mobile Solidly based on examination of studies in more than ten languages and of raw data from unpublished works this is the first attempt in thirty years to bring together in one volume what is known of social mobility around the world Here is the first systematic comparison of mobility patterns in such diverse countries as Sweden and Italy Great Britain and Japan a comparison backed by statistics and given added meaning by discussions of the causes and consequences of mobility The authors analyze in detail the political implications of mobility and they explore the relationship between education and mobility Their discussions of factors making for success or failure in school of the role of intelligence in mobility of the effects on children of growing up in various environments and of the varying personalities of the mobile and non mobile bring together the work of both psychologists and sociologists This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1959
