Pascual-Fernández,Cristina Pita,Maarten Bavinck,2020-04-28 This book offers a comprehensive account of the status and dynamics of people participating in the small scale fisheries SSF of Europe It covers the situation of SSF in 25 coastal

countries thereby providing a portrait of almost every coastal country on the continent and analyzing the recent evolution of the sector Small scale fisheries are argued to be extremely important in Europe as they provide employment and welfare while increasing food sovereignty and maintaining communities in coastal areas The recent worldwide focus on SSF derives from their environmental sustainability which distinguishes many of their activities from those of large scale fisheries This book analyses the diversity of SSF and shows how fishing communities have sometimes developed successful governing models demonstrating social and economic resilience While the book emphasizes the strengths of SSF and the synergies that occur with other marine sectors it also presents cases of failure in which collective action and policy have actually contributed to a weakening of the sector In this context the book shows how governmental policies toward SSF vary considerably from country to country in a way that is not entirely consistent with European policies
