Small Water Impoundments in Semi-arid Regions John L. Thames, Charles D. Ziebell, 1988-01-01      **Columbia Basin**  
**Water Withdrawal Environmental Review (ID, MT, OR, WA).** , 1979      *Ecology of Desert Systems* Walter G. Whitford, Benjamin D. Duval, 2019-08-20 Nearly one third of the land area on our planet is classified as arid or desert Therefore an understanding of the dynamics of such arid ecosystems is essential to managing those systems in a way that sustains human populations This second edition of *Ecology of Desert Systems* provides a clear extensive guide to the complex interactions involved in these areas This book details the relationships between abiotic and biotic environments of desert ecosystems demonstrating to readers how these interactions drive ecological processes These include plant growth and animal reproductive success the spatial and temporal distribution of vegetation and animals and the influence of invasive species and anthropogenic climate change specific to arid systems Drawing on the extensive experience of its expert authors *Ecology of Desert Systems* is an essential guide to arid ecosystems for students looking for an overview of the field researchers keen to learn how their work fits in to the overall picture and those involved with environmental management of desert areas Highlights the complexity of global desert systems in a clear concise way Reviews the most current issues facing researchers in the field including the spread of invasive species due to globalized trade the impact of industrial mining and climate change Updated and extended to include information on invasive species management industrial mining impacts and the current and future role of climate change in desert systems      **BlueDrop Series Rain water harvesting and Utilisation ,      Human Intervention in the Climatology of Arid Lands** Donald R. Haragan, 1990      *Bibliography of Agriculture* , 1991-04      **Little Snake Resource Management Plan** , 2010      The Desert Grassland Mitchel P. McClaran, Thomas R. Van Devender, 1997-09-01 The mixed grass and shrub vegetation known to scientists as desert grassland is common to the basins and valleys that skirt the mountain ranges throughout southwestern North America extending from Arizona New Mexico and Texas down through thirteen Mexican states This variegated ground cover is crucial to life in an arid environment The Desert Grassland offers the most comprehensive study to date of these flora and the rich biotic communities they support Leading experts in geography biology botany zoology and geoscience present new research on the desert grassland and review a vast amount of earlier work They reveal that present day grasses once grew in the ice age forests that existed in these areas before the climate dried and the trees vanished and how the intensity and frequency of fire can influence the plant and animal species of the grassland They also document how the influence of humans from Amerindians to contemporary ranchers public land managers and real estate developers has changed the relative abundance of woody and herbaceous species and how the introduction of new plants and domesticated animals to the area has also affected biodiversity The book concludes with a review of the attempts both failed and successful to reestablish plants in desert grasslands affected by overgrazing drought and farm abandonment Meticulously researched and copiously illustrated

The Desert Grassland is a major contribution to ecological literature For advanced lay readers as well as students and scholars of history geography and ecology it will be a standard reference work for years to come Contribution of the Committee on Desert and Arid Zones Research ,1989 Papers presented at symposia held during the association s annual meetings Wetland and Riparian Areas of the Intermountain West Mark C. McKinstry, Wayne A. Hubert, Stanley H. Anderson, 2004-07-01 Wetlands and riparian areas between the Rocky Mountains and the Sierra Nevada are incredibly diverse and valuable habitats More than 80 percent of the wildlife species in this intermountain region depend on these wetlands which account for less than 2 percent of the land area for their survival At the same time the wetlands also serve the water needs of ranchers and farmers recreationists vacation communities and cities It is no exaggeration to call water the liquid gold of the West and the burgeoning human demands on this scarce resource make it imperative to understand and properly manage the wetlands and riverine areas of the Intermountain West This book offers land managers biologists and research scientists a state of the art survey of the ecology and management practices of wetland and riparian areas in the Intermountain West Twelve articles examine such diverse issues as laws and regulations affecting these habitats the unique physiographic features of the region the importance of wetlands and riparian areas to fish wildlife and livestock the ecological function of these areas their value to humans and the methods to evaluate these habitats The authors also address the human impacts on the land from urban and suburban development mining grazing energy extraction recreation water diversions and timber harvesting and suggest ways to mitigate such impacts In addition to the editors the contributors to this volume are Paul Adamus Oregon State University Corvallis Michael A Bozek University of Wisconsin Stevens Point Robert C Ehrhart Oregon State University Bend James H Gammonley Colorado Division of Wildlife Fort Collins Paul L Hansen Bitterroot Restoration Corvallis Montana E Andrew Hart University of Wyoming Laramie Murray K Laubhan U S Geological Survey Fort Collins Colorado Kirk Lohman University of Idaho Moscow James R Lovvorn University of Wyoming Laramie Neal D Niemuth University of Wisconsin Stevens Point Richard A Olson University of Wyoming Laramie Neil F Payne University of Wisconsin Stevens Point Mark A Rumble U S Department of Agriculture Forest Service Rocky Mountain Research Station Rapid City South Dakota Maureen Ryan University of Toledo Ohio College of Law Brian E Smith U S Geological Survey Northern Prairie Wildlife Research Center Jamestown North Dakota Mark Squillace University of Toledo Ohio College of Law Stephen A Tessmann Wyoming Game and Fish Department Cheyenne David W Willis South Dakota State University Brookings
