Small Groups Political Behavior:

The Handbook of Political Behavior Samuel Long, 2013-11-11 In the writing of prefaces for works of this sort most editors report being faced with similar challenges and have much in common in relating how these challenges are met They acknowledge that their paramount objective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists graduate students and occasionally advanced undergraduate students Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided then generally conclude that no particular classification strategy is superior In elaborating on the process by which the enterprise was initiated editors typically resort to a panel of luminaries who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them Editors usually concede that chapter topics and content do not reflect their original conception but are a compromise between their wishes and the authors expertise and capabilities Editors report that inevitable delays occur authors drop out of projects and are replaced and new topics are introduced Finally editors frequently confess that the final product is incomplete with gaps occurring because of failed commitments by authors or because authors could not be secured to write certain chapters

Political Organizations James Q.

Wilson, 2021-02-09 A major work by one of America's eminent political scientists *Political Organizations* has had a profound

impact on how we view the influence of interest groups on policymaking James Wilson wrote this book to counter two ideas that popular interests will automatically generate political organizations and that such organizations will faithfully mirror the opinions and interests of their members Moreover he demonstrated that the way in which political organizations including parties business groups labor unions and civil rights associations are created and maintained has a profound impact on the opinions they represent and the tactics they use Now available for the first time in paperback this book has broadened its scope to include recently developed organizations as it addresses many of today's concerns over the power of such groups as special interest lobbies In 1973 when this book was first published the press and public were fascinated by the social movements of the 1960s thinking that the antiwar and civil rights movements might sweep aside old fashioned interest group lobbies Wilson argued however that such movements would inevitably be supplanted by new organizations ones with goals and tactics that might direct the course of action away from some of the movements founding principles In light of the current popular distress with special interest groups and their supposed death grip on Congress Wilson again attempts to modify a widely held view He shows that although lobbies have multiplied in number and kind they remain considerably constrained by the difficulty they have in maintaining themselves

for policy in a real and sometimes dangerous world Competitive Comrades Susan L. Shirk, 2023-04-28 Competitive Comrades Career Incentives and Student Strategies in China provides a nuanced analysis of the complexities within China's educational institutions and examines the evolution of student behavior in response to political pressures and career incentives. Focusing on the period between 1960 and 1966, the book delves into the high stakes world of Chinese high schools where the distribution of opportunities, especially under Mao's virtocratic policies, produced a unique blend of ambition and moral posturing. The book argues that Maoist policies, which sought to fuse political virtue with academic performance, created an intense atmosphere of competition that encouraged students to balance their academic and political ambitions with social strategies that would ensure their success. Unlike meritocracies or traditional hierarchies, this virtocratic system intensified the stakes of student relationships and loyalty while paradoxically fostering political cynicism and alienation from the state, a contradiction at the heart of the Maoist vision of revolutionary successors. Through detailed interviews with former students, Competitive Comrades reveals how students navigated these pressures, showing that rather than fostering cooperation and ideological alignment, Mao's policies often drove students toward strategic adaptations aimed at self-preservation and advancement. This exploration of the social and behavioral implications of virtocracy provides critical insights into post-revolutionary Chinese society and presents a comparative framework relevant to other regimes governed by similar principles of moral-based selection. Ideal for scholars of Chinese history, political sociology, and education studies, Competitive Comrades sheds light on the unintended consequences of revolutionary moral ambitions on youth culture and social cohesion in Communist China. Masters of Political Science Donatella Campus, Gianfranco Pasquino, 2009-09-01 For a while now, political science as a discipline has been big enough in terms of the number of academics and analytically mature enough to justify reflections on and reviews of its achievements. In fact, there is no lack of general handbooks, dictionaries, and state-of-the-art assessments, as well as reflective journals such as the ECPR's own *European Political Science*, which are useful in helping us to understand and evaluate where we currently are and where we might still need to go. The focus of these texts, however, is on particular concepts, themes, research areas, institutions, or behaviour. What they rarely do is indulge in a critical reflection on the political scientists themselves, especially those who are commonly accepted as having made the most significant contributions to the growth of their discipline. This book fills an

important gap in the growing reflective literature on the political science discipline it consists of a series of objective profiles of the Masters of Political Science written by political scientists who have read and studied their work and who are therefore in a position to evaluate the nature of their contributions The Masters Robert Dahl Anthony Downs David Easton S E Finer Samuel P Huntington Juan J Linz Seymour Martin Lipset Giovanni Sartori Sidney Verba Aaron Wildavsky Hans Morgenthau Masters of Political Science was originally published in Italian by il Mulino Publishing House **The Political Influence of Churches** Paul A.
