Modern Technology Of Oils, Fats & Its Derivatives (2nd Revised Edition) NIIR Board,2013-02-05

Until recently fats and oils have been in surplus and considered a relatively low value byproduct Only recently have energy uses of fats and oils begun to be economically viable Food value of fats and oils is still far above the energy value of fats and oils Industrial and technical value of fats and oils is still above the energy value of fats and oils Animal feeds value of fats and oils tends to remain below the energy value of fats and oils With development of new technology oils and fats industry has undergone a number of changes and challenges that have prompted the development of new technologies and processing techniques Oils and fats constitute one of the major classes of food products In fact oils and fats are almost omnipresent in food processing whether naturally occurring in foods or added as ingredients for functional benefits and despite the impression given by several sources to the contrary they remain an essential part of the human diet However it is increasingly apparent that both the quantity and the quality of the fat consumed are vital to achieve a balanced diet They are essential constituents of all forms of plant and animal life Oils and fats occur naturally in many of our foods such as dairy products meats poultry and vegetable oil seeds India is the biggest supplier of greater variety of vegetable oil and still the resources are abundant The applications of oils are also seen in paints varnishes and related products Since the use of oils and fats in our daily life is very noticeable the market demands of these products are splendid Special efforts has been made to include all the valuable information about the oils fats and its derivatives which integrates all aspects of food oils and fats from chemistry to food processing to nutrition The book includes sources utilization and classification of oil and fats followed by the next chapter that contain details in physical properties of fat and fatty acids Exquisite reactions of fat and fatty acids are also included in the later chapter It also focuses majorly in fractionation of fat and fatty acids solidification homogenization and emulsification extraction of fats and oils from the various sources detail application in paints varnishes and related products is also included It also provides accessible concentrated information on the composition properties and uses of the oils derived as the major product followed by modifications of these oils that are commercially available by means of refining bleaching and deodorization unit with

detailed manufacturing process flow diagram and other related information of important oils fats and their derivatives
Special content on machinery equipment photographs along with supplier details has also been included We hope that this book turns out to be considerate to all the entrepreneurs technocrats food technologists and others linked with this industry

Extrusion Processing Technology Jean-Marie Bouvier,Osvaldo H. Campanella,2014-06-23 Extrusion is the operation of forming and shaping a molten or dough like material by forcing it through a restriction or die It is applied and used in many batch and continuous processes However extrusion processing technology relies more on continuous process operations which use screw extruders to handle many process functions such as the transport and compression of particulate components melting of polymers mixing of viscous media heat processing of polymeric and biopolymeric materials product texturization and shaping defibering and chemical impregnation of fibrous materials reactive extrusion and fractionation of solid liquid systems Extrusion processing technology is highly complex and in depth descriptions and discussions are required in order to provide a complete understanding and analysis of this area this book aims to provide readers with these analyses and discussions Extrusion Processing Technology Food and Non Food Biomaterials provides an overview of extrusion processing technology and its established and emerging industrial applications Potency of process intensification

and sustainable processing is also discussed and illustrated The book aims to span the gap between the principles of extrusion science and the practical knowledge of operational engineers and technicians The authors bring their research and industrial experience in extrusion processing technology to provide a comprehensive technical yet readable volume that will appeal to readers from both academic and practical backgrounds This book is primarily aimed at scientists and engineers engaged in industry research and teaching activities related to the extrusion processing of foods especially cereals snacks textured and fibrated proteins functional ingredients and instant powders feeds especially aquafeeds and petfoods bioplastics and plastics biosourced chemicals paper pulp and biofuels It will also be of interest to students of food science food engineering and chemical engineering Also available Formulation Engineering of Foods Edited by J E Norton P J Fryer and I T Norton ISBN 978 0 470 67290 7 Food and Industrial Bioproducts and Bioprocessing Edited by N T Dunford ISBN 978 0 8138 2105 4 Handbook of Food Process Design Edited by J Ahmed and M S Rahman ISBN 978 1 4443 3011 3 *Special Study on Economic Conditions in Non-self-governing Territories* United Nations.
