Smart Inspection Systems Duc T. Pham, R J Alcock, 2002-12-09 Smart Inspection Systems Techniques and Applications of Intelligent Vision will enable engineers to understand the various stages of automated visual inspection AVI and how artificial intelligence can be incorporated into each stage to create smart inspection systems The book contains many examples that illustrate and explain the application of conventional and artificial intelligence techniques in AVI The text covers the whole AVI process from illumination image enhancement segmentation and feature extraction through to classification and includes case studies of implemented AVI systems as well as reviews of commercially available inspection systems Each chapter concludes with exercises This book will be of interest to users and developers of commercial industrial inspection systems as well as researchers in the fields of machine vision artificial intelligence and advanced manufacturing engineering Visual Informatics: Bridging Research and Practice Halimah Badioze Zaman, Peter Robinson, Maria

Petrou, Patrick Olivier, Heiko Schröder, 2009-11-14 Visual informatics is a field of interest not just among the information technology and computer science community but also other related fields such as engineering medical and health informatics and education starting in the early 1990s Recently the field is gaining more attention from researchers and industry It has become a multidisciplinary and transdisciplinary field related to research areas such as computer vision visualization information visualization real time image processing medical image processing image information retrieval virtual reality augmented reality pervasive visual mathematics 3D graphics multimedia fusion visual data mining visual ontology as well as services and visual culture Various efforts have been vested in different research but operationally many of these systems are not prominent in the mass market and thus knowledge and research on these phenomena within the mentioned areas need to be shared and disseminated It is for this reason that the Visual Informatics Research Group from Universiti bangsaan Malaysia UKM decided to spearhead this initiative to bring together experts in this very diversified but important research area so that more concerted efforts can be undertaken not just within the visual informatics community in Malaysia but from other parts of the world namely Asia Europe Oceania and USA This first International Visual Informatics Conference IVIC 2009 was conducted collaboratively by the visual informatics research community from the various public and private institutions of higher learning in Malaysia and hosted by UKM **Research Vishwa** Dr. Sachin S.
