teacher and learner interact on a one to one basis so that individual needs can be incorporated effectively into the training sessions. Additionally, the exercises encourage the use of basic learning principles such as immediate feedback and positive reinforcement while gradually increasing the difficulty level of the exercises. For each of the training sections, specific suggestions are offered to assist the teacher in finding additional exercises and activities that are personally relevant to the learner. The Thinking Skills Workbook will be a valuable tool for facilitating the recovery of cognitive skills and is written for easy use by professional rehabilitation staff, paraprofessionals, and/or family members. The incorporation of these effective learning strategies along with the many revisions will make the book very useful and provide for a rewarding experience for both teacher and learner.

**Trauma** Muriel Prince, Muriel Warren, 2004. In this post 9/11 world, therapists need to expand their toolboxes to deal with trauma and its effects. This book provides a new way of dealing with the devastating emotional residue of a traumatic event. It centers on the innovative application of hypnotherapy to help trauma victims self-actualize, regain their lives, and move forward again. This book outlines the effects of trauma on mind and body and provides comprehensive systems and treatment plans for the mental disorders caused or exacerbated by trauma. Many people are familiar with the famous fight or flight responses to trauma, but few know about the freeze response. Freeze is the most dangerous of the trio since it inhibits any reaction and leaves the victim immobile. It can lead directly to Post-traumatic Stress Disorder. Also included is a brief survey of brain research and its implications. Dr. Warren takes readers on a brief journey of self-discovery to unlock their full self-potential and raise it to a new level.
