Abdelrahman, Erol Gelenbe, Gokce Gorbil, Ricardo Lent, 2015-08-20 The 30th Anniversary of the ISCIS International Symposium on Computer and Information Sciences series of conferences started by Professor Erol Gelenbe at Bilkent University Turkey in 1986 will be held at Imperial College London on September 22-24, 2015. The preceding two ISCIS conferences were held in Krakow, Poland in 2014 and in Paris, France in 2013. The Proceedings of ISCIS 2015 published by Springer brings together rigorously reviewed contributions from leading international experts. It explores new areas of research and technological development in computer science, computer engineering, and information technology and presents new applications in fast-changing fields such as information science, computer science, and bioinformatics. The topics covered include but are not limited to advances in networking technologies, software-defined networks, distributed systems, and the cloud security in the Internet of Things, sensor systems, and machine learning and large data sets. Service Availability Dave Penkler, 2006-12-14 This book constitutes the thoroughly refereed post-proceedings of the Third International Service Availability Symposium ISAS 2006 held in Helsinki, Finland in May 2006. *Guide to Reliable Internet Services and Applications* Charles R. Kalmanek, Sudip Misra, Yang (Richard) Yang, 2010-06-09 An oft repeated adage among telecommunication providers goes There are five things that matter reliability reliability reliability time to market and cost If you can't do all five at least do the first three Yet designing and operating reliable networks and services is a Herculean task Building truly reliable components is unacceptably expensive forcing us to construct reliable systems out of unreliable components The resulting systems are inherently complex consisting of many different kinds of components running a variety of different protocols that interact in subtle ways Inter networks such as the Internet span multiple regions of administrative control from campus and corporate networks to Internet Service Providers making good end to end performance a shared responsibility borne by sometimes uncooperative parties Moreover these networks consist not only of routers but also lower layer devices such as optical switches and higher layer components such as firewalls and proxies And these components are highly configurable leaving ample room for operator error and buggy software As if that were not difficult enough end users understandably care about the performance of their higher level applications which has a complicated relationship with the behavior of the underlying network Despite these challenges researchers and practitioners alike have made tremendous strides in improving the reliability of modern networks and services

*Advances in Knowledge Discovery and Data Mining* Ming-Syan Cheng, Philip S.
