Osborne,Amanda Ball,2010-10-18 This volume brings together researchers from a range of disciplines including accounting political science management sociology and policy studies to discuss and develop our knowledge and theory of the nature of accountability in contemporary global society and the challenges it may pose for public policy and management *Advances in Environmental Accounting & Management* Ataur Belal,Stuart Cooper,Fátima de Souza Freire,2017-03-28 Vol 6 of *Advances in Environmental Accounting Management* aims to advance knowledge of the governance and management of corporate environmental impacts and the accounting for these Social and Environmental Accounting Laurie Mook,2007 The Expanded Value Added Statement EVAS makes a significant contribution to the field of accounting by highlighting hitherto invisible dimensions and integrating them into a single accounting statement This in turn helps to tell a much richer performance story of organizations and opens up new possibilities for organizational and social change The EVAS recognizes established traditions in the field of accounting but at the same time pushes the envelope aiming at viable changes in accounting practices that nurture a more sustainable society It provides a considerable advance in social accounting by integrating economic social and environmental factors in a format that is applicable to different organization types time dimensions and contexts The EVAS has four main influences mainstream accounting critical accounting social accounting and sustainability Mainstream accounting particularly the progressive practice of value added

accounting highlights the wealth created or destroyed and distributed through the results of labour and capital in transforming external goods and services. Critical accounting contributed with two insights that accounting is not a neutral activity and that accounting practices are shaped by and can in turn shape social reality. Social accounting, especially the subfield of integrated social accounting, has provided a significant precedent for the EVAS by broadening the range of items included in accounting statements to take into account externalities. Finally, the concept of sustainability provided the conceptual and normative framework that guided the selection of variables included in the EVAS. In this manuscript-based dissertation, the EVAS is applied to three case studies. The first looked at the value added of volunteer work and unreimbursed out-of-pocket expenses in ARNOVA, a non-profit scholarly association. The second case study, a construct of 33 sustainable buildings in the USA, shows the costs and benefits of building in sustainable ways versus using traditional building techniques. The third case, based on a master-planned community in Vancouver, includes an economically targeted investment, a non-profit community police centre, a non-profit neighbourhood house, and municipal government agencies, and shows how the EVAS can integrate economic, social, and environmental impacts and help to make investment decisions that support sustainability.
